America's best built boats

THE NAME "ALUMA CRAFT" ON A BOAT IS LIKE "STERLING" ON SILVER... AN UNQUESTIONED MARK OF QUALITY. ON OUR SMALLEST CAR-TOPPER FISHING MODEL OR ON OUR NEWEST HI-STYLE, HARD-TOPPER RUN-ABOUT THE ALUMA CRAFT TRADE MARK IS YOUR ASSURANCE THAT IT IS ONE OF AMERICA'S BEST BUILT BOATS.

Fully Warranted

THE MATERIALS AND WORKMANSHIP OF EVERY ALUMA CRAFT BOAT, ALUMINUM OR FIBER GLASS, IS FULLY WARRANTED TO BE OF FIRST QUALITY AND TO BE EXACTLY AS REPRESENTED BY THE COMPANY. ALUMA CRAFT'S REPUTATION FOR QUALITY AND VALUE HAS BEEN BUILT ON YEARS OF CUSTOMER SATISFACTION. WE RESERVE THE RIGHT TO MAKE CHANGES IN DESIGN.

ALUMA CRAFT BOAT COMPANY / 1515 CENTRAL AVE. N.E.
MINNEAPOLIS, MINN.

The

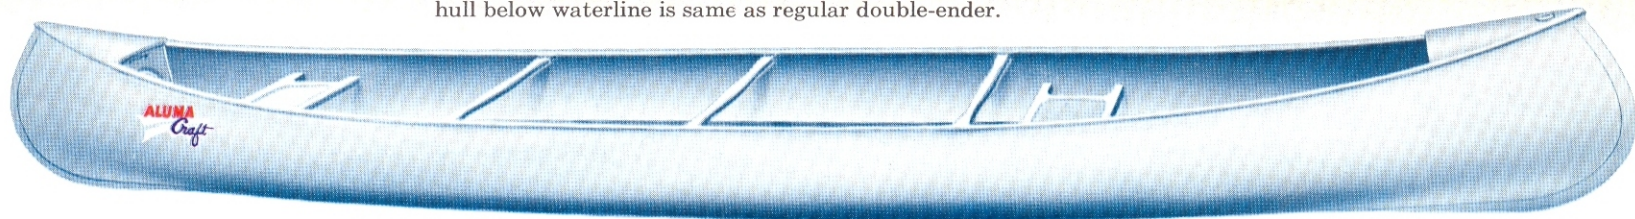

C-17

ALUMINUM
Canoe

All the fun of canoeing—with extra safety and stability! That's why this 17-foot model is a favorite with boys' and girls' camps...and with experienced voyagers. Weighs only 88 pounds—easy to portage. Midship beam is held to 37¼" for smoother paddling, beam fullness carried toward both bow and stern to gain the carrying capacity of most 18-footers. Keel and stem well protected with extra thick extrusions. Polystyrene provides positive flotation.

NOTE: You can combine canoeing and outboarding fun with the Model CO-17 — same as C-17 except has fantail for center-mounting motor and a stern seat for operating. Paddles as easily as C-17 because hull below waterline is same as regular double-ender.

C-16 CANOE ALUMINUM

NEW! *For the expert:* the C-16 Wilderness Canoe—fast, maneuverable, responsive. OBC capacity is 435 pounds, weight only 70 pounds. 35½" wide and 13¼" deep amidships, 22" deep forward and stern. Overall length 16'. Round bottom, built-in flotation, extra heavy extruded keel and stem. Recommended for the experienced canoeist who likes to travel light and fast.

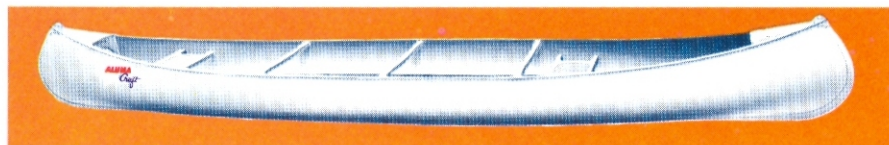

CO-17 ALUMINUM

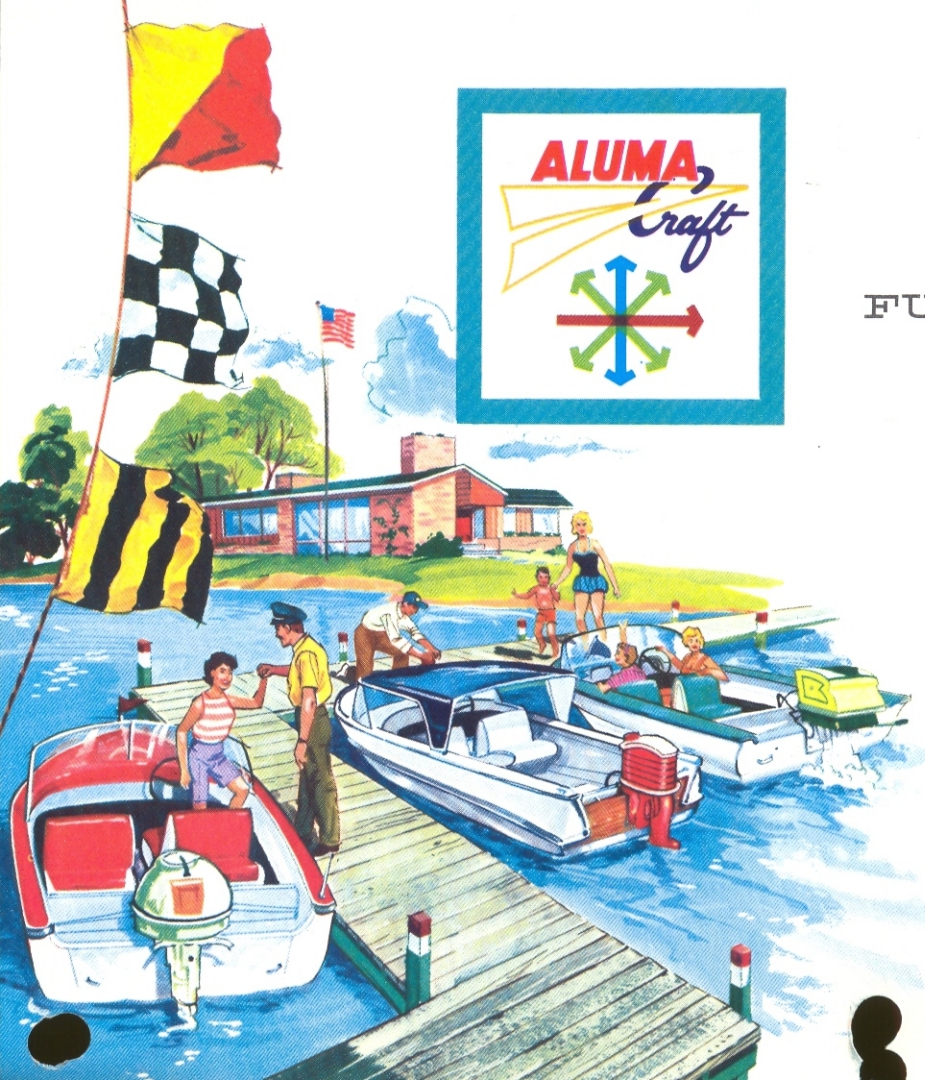

Same as C-17 except has fantail stern for center mounting of motor.

FUN'S IN *Style* —

... and with this new 1960 line of boats, Aluma Craft has taken special care to put new style in your fun! There's a complete new Yacht Club series that features both aluminum and molded fiber glass hulls plus Aluma Craft's famous safety and durability features. In addition, there are the Family Cottage, Fishing, and Wilderness series, adding up to a total of 29 boats. Each one is designed to meet specific boating needs with thrilling, safe, trouble-free performance that adds to your pleasure ... makes your investment in Aluma Craft boat doubly satisfying. Here in this Boat Selector catalog, undoubtedly, there's a model that will exactly match your requirements for size, motor capacity, and special features. The OBC weight capacities shown include the weights of the motors. Take a look now — and order yours soon!

Introduction to family cottage fleet

Here you'll find 6 boats Aluma Craft has designed to meet a wide variety of uses . . . water skiing, fishing, cruising—even some high speed going. You'll find one quality common to all of them: they are exceptionally rugged, exceptionally safe boats. Aluma Craft recognizes that youngsters as well as adults will be using these boats, and while there is no substitute for observing the rules of water safety, built-in safety features are a worthwhile precaution. Family Cottage boats are available in 14, 15, and 16 foot lengths, and offer a wide variety of seating arrangements, accessory equipment, and motor capacities, so that there's one that's just right for your family and your budget.

Introduction to fishing fleet section

Fishermen are generally interested in the fish as much as they are in their boat, *provided* the boat meets their requirements. Aluma Craft has developed a series of 9 fishing boats in 12' and 14' lengths, each one with its own individual features so that you will be able to select a boat that's tailor-made to your needs, that will let you concentrate on the fish instead of the boat. Rugged construction keeps maintenance to a minimum. You can choose seating capacity to fit the largest group you ever fish with. If you have to cross a lot of water to your favorite fishing spot, you'll want one of the faster models. So think about how you like to fish, and you'll quickly find an Aluma Craft model that's right for you!

Introduction to wilderness fleet section

Here are the boats designed for the outdoor man, the man who wants to bring his son along in the great tradition of men who have known and loved the wilderness. In canoes and hunting boats, Aluma Craft offers a choice of models that combine safety, rugged construction, and light weight, making them ideal for a day's outing or a week's trip. The basic designs of these boats are well established and have been thoroughly tested by thousands of well-satisfied owners. The safety features and durability of the canoes have also made them very popular with summer camps.

A word about

Price—
Style—
Quality—

Every manufacturer has vital decisions to make about price, style and quality . . . and we feel their importance warrants telling you how Aluma Craft stands on these questions.

In a boat—as in an airplane—style has a direct bearing on both performance and safety. Aluma Craft styling stems from seaworthy design and so has an especial appeal to men who have grown up with boats.

No Aluma Craft transom has ever failed, no keel has ever worn through.

We have to weigh our standards of style and quality against price. At the risk of losing a few sales, we frankly lean toward quality—because of the many men who know why quality is important and insist on it . . . and because we believe that the man who makes boating a part of his life will quickly discover that in boats, style and seaworthiness go together; quality, safety, and boating satisfaction go together.

ALUMA CRAFT BOAT COMPANY

America's Best Built Boats

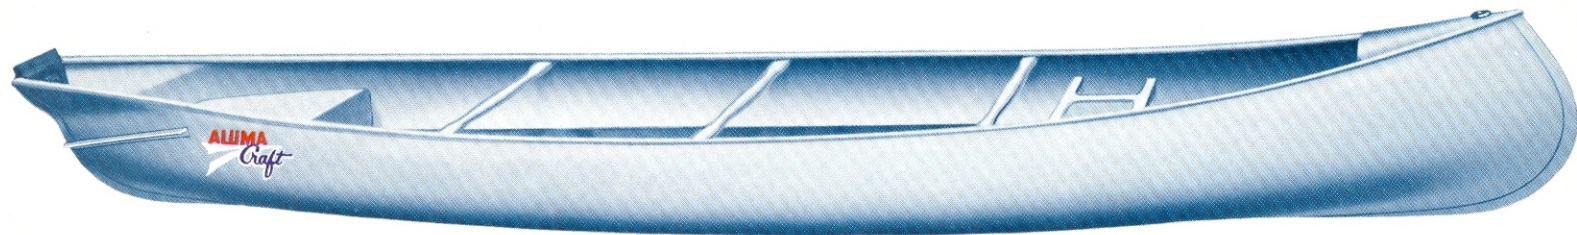

The

CO-15 *Canoe* ALUMINUM

Here's an outboard lake canoe you can also use for wilderness trips. Fantail design permits center mounting of motor, yet hull below waterline is exactly the same as a double-ender to permit practically effortless forward or backward paddling. Weighs only 82 pounds. Extra steady, with more than a 3-foot beam, with fullness carried well forward and aft. (This also gives it the carrying capacity of most 17-footers!) Has positive polystyrene flotation and heavy extruded keel and stem to protect against rock and shore abrasion.

C-15 CANOE

NOTE: For cottage, camp, and lake canoeing, where you know you won't want a motor, order the C-15. It's the same as the CO-15 except that it's a full double-ender, and weight is reduced to only 77 pounds.

The

Deep C

ALUMINUM
15 FOOTER

Every inch of its 15 feet, from its rugged bow casting to the patented, self-bailing Aqueduct transom tells you that here's a stable, dependable utility boat that still has style and speed. Average depth, stern to bow: approx. 27". Beam amidships: over 5 feet. OBC certified for 60 horsepower. We recommend 20" transom instead of 15" if you plan to use over 35 h.p. motor. Available in natural satin finish aluminum or one of three optional color combinations. Also optional: top, windshield, backrests, steering and lights.

NOTE: for a completely open big water fishing or utility boat of the same hull, the Deep C is available without forward deck and with 4 seats.

ALUMINUM

Ducker

The

Year after year, the Ducker gains in popularity—and here are just a few of the reasons why: the Aluma Craft Ducker weighs only 67 pounds... draws 3" with two adults... has double through-deck push pole holes... blind loops... self-draining decks... never dries out and leaks... breaks ice without damage... and it's delivered fully camouflaged for easy hiding. Motor bracket available. Without question this is the finest duck boat made.

ALUMINUM

Retriever

The

This is an open model with the same hull as the Ducker and a fantail mount to handle motors up to 3 horsepower. Very easy to row. Recommended for use on small sheltered water.

Gay Mate

FIBER GLASS
15 FOOT
RUNABOUT

A clipper bow highlights the sleek lines of this sports runabout that's every bit as fast as she looks. Construction is of strong, molded fiber glass, with a streamlined deck and flared sides for dry going in rough water. Castings are polished aluminum. The Gay Mate is OBC certified for motors up to 65 horsepower. Flat-floored cockpit is wide and roomy. The walk-thru forward seat and stern seat have two-toned crimson lake and oyster white upholstery to match the molded-in colors of the hull and deck. Full length, polished, solid aluminum gunwales run from bow to stern. And the Gay Mate is a complete package—it comes equipped with Aqueduct transom, concealed gas tank storage, steering installed, rakish wrap-around windshield, chrome-plated combination flag-staffs and running light, plus standard deck hardware. In every way it meets Aluma Craft's—and your own—highest standards!

The

Model **A**

ALUMINUM
14 FOOTER

OBC certified for 12 horsepower, the Model A was designed with the fisherman in mind. It weighs only 130 pounds so it's easy to trailer or car-top. It rows easily, and a 49" beam makes it safe and stable. Four seats or, with the optional forward deck, three. Easy to afford and easy to maintain—you may never want a bigger boat.

Also available: Economy Model AL—same as Model A except equipped with wood seats that have built-in polystyrene flotation.

fishing fleet

The

Model **E**

ALUMINUM
12 FOOTER

Model E is probably used more ways than any other Aluma Craft boat. It's light, strong, and sturdy, easy to handle and easy to store. It's a boat you can enjoy rowing. Under power (OBC certified for 12 horsepower) you'll find its 49" beam keeps it stable and steady. Camouflage it and you have a first-rate square-sterned hunting boat. Ample leg and tackle box room.

For extra economy: order Model EL—same as Model E except has wood seats with built-in polystyrene flotation.

Forward deck available.....	Yes	Yes

Over 20,000 of this model in use. Erich Swenson design with a fine, flaring bow that turns down spray and bow waves in rough water. 54" beam and 52" transom makes it steady for fishing, safe for family fun. It's designed for intermediate power—up to 20 horsepower—and planes easily for fast-going. Popular with resort owners and rental operators. Available in natural satin finish aluminum and three optional color combinations. Forward deck, control deck, and steering wheel all available as optional equipment.

Also available: Economy Model FL, featuring a slightly fuller bow, transverse ribs and stiffeners, and wood seats with built-in polystyrene flotation. Model FL-A—has aluminum seats, otherwise same as Model FL.

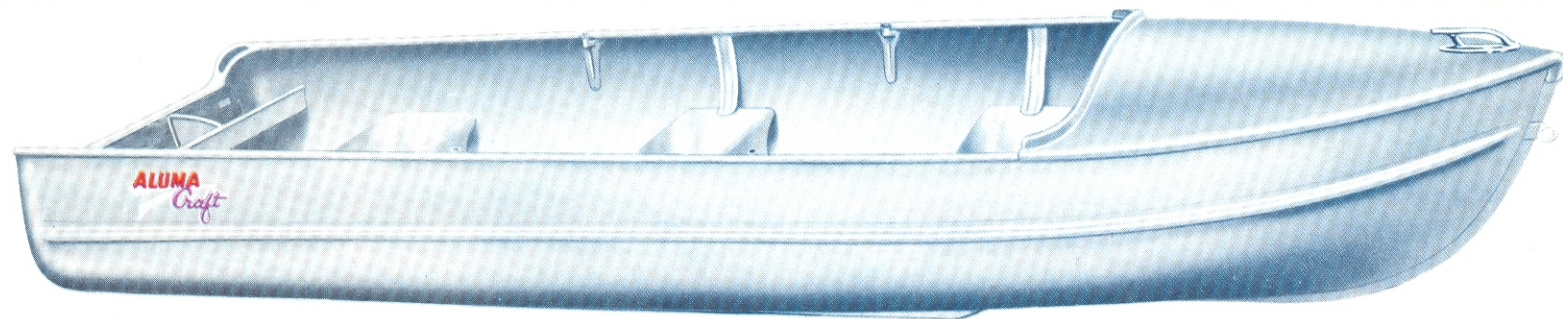

fishing fleet

The

Model FD

ALUMINUM
14 FOOTER

There's nothing like the Model FD for versatility—and that means all-round family fun. Wide and deep (the midship beam is over 55½", depth 22"), this boat is safe . . . stable . . . and still sporty! OBC certified for 35 horsepower, wait till you feel it take off with your own power plant on it! Yet for all its raciness, it rides out rough water smoothly and is easy to handle, whether you're fishing, cruising, or water skiing. The forward deck shown is optional, the exclusive, patented Aqueduct transom is standard. Available in natural satin finish aluminum and three optional color combinations. Optional walk-through deck also available.

The

Model FDL

ALUMINUM
14 FOOTER

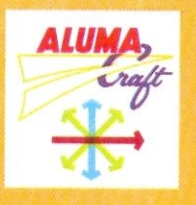

Introduced last year, Model FDL has been a big success with men who wanted a deeper, wider, steadier family fishing boat at a low, low price. The Model FDL features lighter construction than the regular Model FD, yet it's OBC certified for motors up to 22 horsepower and 775 pounds load capacity. It weighs only 180 pounds, so it's easily trailered or car-topped, handles well around the dock, and is fun to row. Equipped with wood seats featuring built-in polystyrene flotation. A real satisfaction to own, and guaranteed for years of service.

The

Model FDR

ALUMINUM
14 FOOTER
RUNABOUT

Here's a handsome utility runabout that will please every member of the family! It's fast . . . for fun . . . rugged and stable . . . for safety! You'll agree it's ideal for all-purpose use: water skiing, speed running, fishing, and family boat enjoyment. It has a long, streamlined forward deck with comfortably low, removable seats and back-rests, upholstered in oyster white and charcoal grey. It features the patented Aqueduct transom, and is OBC rated for motors up to 35 h.p. OBC load capacity is 865 lbs., weight is only 286 lbs. Steering, windshield, and lights are optional. Finished in natural satin finish aluminum or choice of three optional color combinations.

family cottage fleet

The

Model K

ALUMINUM
16 FOOTER

16 feet long, almost 5 feet wide amidship, the Model K is steady and stable, very fast with larger motors. It's OBC certified for 35 horsepower, and the 52" wide patented Aqueduct transom is standard. Proved itself in rugged going for Lake of the Woods guides and camp owners, the Model K is especially recommended for larger waters. Three optional color combinations or natural satin finish aluminum. If you like—make yours a practical runabout with the optional forward deck, walk-thru deck, and steering wheel.

Also available: Economy Model KL. Same as Model K except has wood seats with built-in polystyrene flotation and has standard transom.

Forward deck available.....	Yes	Yes

Special hull design makes this 12-footer exceptionally fast, gets you from the dock to your favorite fishing spot in a hurry. Not quite 12 feet long and weighing only 130 pounds, it is OBC certified for 18 horsepower. Three seats allow plenty of leg and tackle box room. Handy to own because it is so easy to car-top or trailer. Take it to your favorite fishing lake today, your family's favorite cruising lake tomorrow (its speed adds extra zest to every outing). Available in natural satin finish aluminum or three optional color combinations.

NOTE: also available in lower-priced "L" series, having wood seats with built-in polystyrene flotation. Order Model RBL.

The

yacht club

Queen 16

ALUMINUM
16 FOOTER

Beautifully fast, easy riding, adaptable—those are the ways owners describe the Queen Sixteen. You'll use it for smooth, safe water skiing . . . for fishing on practically any inland or coastal water . . . for family cruising (there's space enough for every one!) OBC certified to handle motors up to 80 horsepower, 73" midship beam, 68" transom, and average depth of 32". It features a streamlined forward deck and automotive type upholstery in a pleasing two-tone color combination. Optional hull color combinations give you a choice of red, blue, black, and white, which will be highlighted by standard polished gunwales. Walk-through back-rest gives you easy access to the large flat-floored cockpit where you can set up folding yacht chairs. All accessories and equipment shown but not mentioned above are optional.

The yacht club

Queen Merrie

ALUMINUM
18 FOOTER

There's fun for every member of the family with the Queen Merrie. It's designed for water skiing, cruising, adventuring. Weighing only 567 pounds, it's easy to handle on a regular trailer, take to waters you've never traveled before. The beautiful hull has a fine bow line with full length spray rails and a long forward deck to make it exceptionally dry in rough water. Optional bunks can be fitted under the forward deck, and there are large storage compartments under the forward seats. Deck flooring is plywood. The Queen Merrie has a 20" Aqueduct transom and is OBC certified for 90 horsepower. Special optional jump seats behind the forward seat enable passengers to face the stern for comfort and trolling. Painting and the equipment shown are all optional.

Queen Merrie

DELUXE

STERN
VIEW

Here's the sensation of the boat show . . . the Yacht Club Deluxe Queen Merrie... a standout wherever you take her. And under her jaunty lines is pure boating pleasure. Design and size are the same as the Queen Merrie. Probably even more than with the standard Queen Merrie, you'll want to order the optional bunks fitted under the long forward deck. Large cockpit has a flat floor. Storage lockers are built-in. Special deluxe fittings include polished gunwales and castings and the optional fiber glass hardtop; optional steering, windshield, lights, hardware and flagstuffs. The Deluxe Queen Merrie weighs 577 lbs. Handles up to a 90 horsepower motor. Choose from six bright new standard color combinations with matching upholstery on the walk-thru forward seat and back-to-back jump seats.

Skisher

FIBER GLASS
15 FOOT
RUNABOUT

Here's another version of the popular Gay Mate. You get the same sleek hull, the same sweeping deck, the same complete fittings (so there's nothing extra you need to buy) . . . the difference is the seating arrangement. The Skisher is laid out especially for water skiing and comfortable trolling, and if these are the ways you'll be using your boat, this is the model to buy. Instead of a stern seat, jump seats facing aft are set behind the walk-thru forward seats, leaving a big, open flat-floored cockpit.

Tangier

FIBER GLASS
16 FOOT
RUNABOUT

Here's the combination you've been looking for in a fiber glass boat: years ahead design (by Jack Morgan & Associates of Chicago) . . . a fine clipper bow, quick-planing hull, and the new stable-matic chines (by Aluma Craft's renowned Erich Swenson). The Tangier will give you safe yet thrilling performance at all speeds—and you can use a motor up to 80 horsepower! Delivered equipped, ready to go, with steering, hardware, windshield, lights, and flagstays installed. Some of its special features are the gayly upholstered back-to-back seats with storage lockers between them . . . the big flat cockpit floor . . . a folding cockpit table . . . arm rests . . . concealed control cables . . . concealed gas tank storage . . . and the locking glove compartment on the dash. Polished gunwales, polished aluminum castings, and your choice of six molded-in color combinations—and order early, because the Tangier stands fair to being the most wanted boat of the year!

Torino

FIBER GLASS
14 FOOT
RUNABOUT

Another new fiber glass model from Aluma Craft, 14 feet long and every foot designed for extra boating pleasure. Width amidships is 65", tapering to 60" at the transom to give plenty of space for passengers and gear, whether you're out fishing or enjoying a picnic-cruise. The Torino has a 20" transom, and it's OBC approved for motors up to 45 horsepower—which means there's plenty of "go" when you want it. The curved wrap-around windshield makes your Torino much more comfortable. It's roomy and seaworthy . . . an ideal boat for water-skiing, cruising and fishing. Steering, upholstery, lights and windshield are standard equipment. Take your choice of three optional color combinations.

specifications

Length overall	14'	Safety flotation	Yes
Width amidships	65"	Bottom design	"V" with stable-matic chine
Width at transom	60"	Weight	425 lbs.

Tripoli

FIBER GLASS
18 FOOT
RUNABOUT

If you bought the brilliant new Tripoli on the basis of style alone, you'd have quite a surprise in store for you the first time you took her out. Its flashing lines cover a quick hull of "V" bottom design with round bilges that gives you excitingly fast, smooth, and safe performance with up to a 90 horsepower motor. The Tripoli is wide, deep, and roomy, with space-saving back-to-back jump seats that create a really big, open, flat-floored cockpit with a folding table. There are between-seat lockers and concealed gas can compartment for shipshape storage. Steering, windshield, flagstaffs, lights, and hardware are standard equipment. Polished gunwales, polished aluminum castings, and your choice of six permanent molded-in body colors, with durable matching upholstery.

Craft offers these

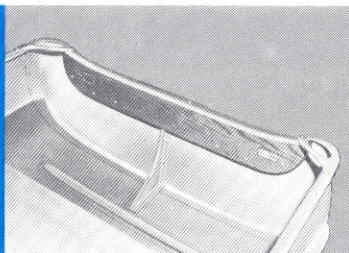

10 Extra Values

NEW STABLE-MATIC CHINES. Featured on Tangier, Torino, Skisher, and Gay Mate provide a more level ride—especially on turns, where it practically eliminates excessive banking.

SELF-BAILING AQUEDUCT TRANSOM. Covered by U. S. Patent #2,660,142—exclusive on all Aluma Craft that are OBC certified for more than 25 h.p. Keeps gasoline and motor oil out of hull by collecting and discharging it overboard.

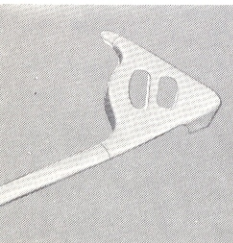

STANDARD TRANSOM. This extra strong transom is used for Aluma Craft which are OBC certified for 25 h.p. or less. Despite its lightweight and streamlined beauty, we have never had a failure with it!

FLOTATION. All Aluma Craft are built with either expanded polystyrene or sealed aluminum air chambers.

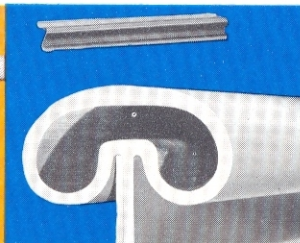

EXTRUDED KEELS. No Aluma Craft keel has ever worn through—and the reason: this extra thick extruded keel that provides a full $\frac{1}{4}$ " protection against beach and stone abrasion.

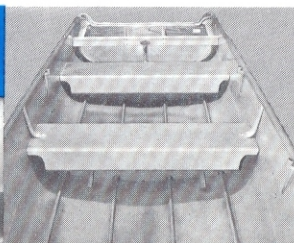

BOW CASTING. Designed to interlock with gunwales and so gain added strength. Streamlined design includes non-protruding carrying handle models.

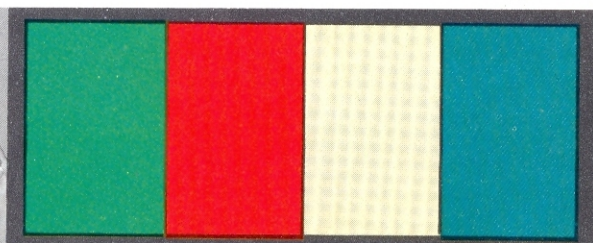

STERN CASTINGS. Interlocks with gunwales and transom for extra strength and stiffness. Design includes convenient carrying handles on most models.

SPLASH RAILS AND GUNWALES. Both are extra thick extrusions. Gunwale interlocks with both bow and stern castings... splash rails add extra strength, will withstand heavy blows.

LONGITUDINAL KEELSONS AND TRANSVERSE STIFFENERS. Featured in F, FD, and C models to increase rigidity, strength... permits free drainage from bow to stern. Transom drains on all models.

Colors of Aluma Craft fiber glass models are permanently molded in. Only highest quality, fade-resistant colors are used.
