ALUMACRAFT

THE ALUMINUM ACTION LINE

canoes

ALUMACRAFT CANOES HAVE BECOME A HALLMARK BY WHICH OTHERS ARE JUDGED!

From bow to stern, inch by inch, there are many little things that add up to a canoe that's a mile out front of competitors.

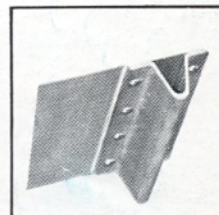

A canoe that is dominating racing* and at the same time, a canoe that rental liveries from coast to coast are switching to because of its ease in handling, its strength, and its durability.

CHECK THESE UNIQUE FEATURES: Hull and all parts of the Quetico canoes are made from heat-treated 6061 T-6 marine alloy aluminum • Bow and stern stems made of .090" gauge aluminum • Aluminum extruded keels and gunwales • Tunnel-designed contoured carrying yoke • Coast Guard-approved flotation sealed in bulkheads.

Deep Keel

Cruising Keel

Whitewater Keel

QT-15 C QUETICO

Designed for maximum performance and lightness, this canoe proves to be perfect not only on the lakes but also for the avid canoeists who require a highly maneuverable canoe in fast, winding streams and rivers. This canoe performs so well that one person can paddle it with ease.

QT-17 W QUETICO

The deep keel minimizes winddrift and paddles easily without constant correction. Even on a windy lake, this canoe is so easy to control it makes beginners look like experts.

QT-17 CL QUETICO

Except for its lighter weight, it shares the same features as the QT-17-C countersunk rivets in bow and stern stems, and colorful Indian trim.

QT-17 C QUETICO

Considered by many avid canoeists to be one of the finest, safest, and easy-to-handle canoes on the market today. Our most popular and highly recommended canoe for all family use because of its easy portaging and high performance on rivers or lakes.

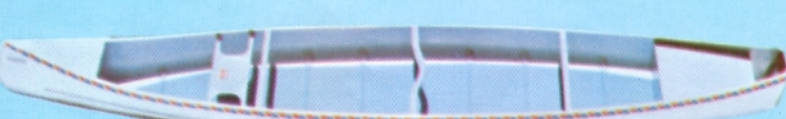

QT-17 WW QUETICO

This extremely popular Quetico Whitewater Canoe has, in a very short time, become a legend because of its great performance under adverse conditions. Equipped with rugged shoe keel, countersunk rivets in keel stem area, and two extra ribs for increased strength and durability.

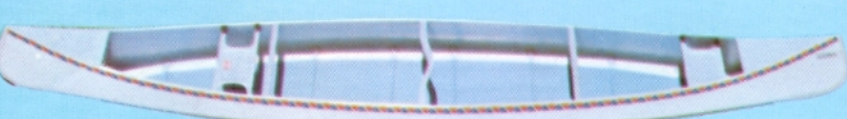

QT-17 WWR QUETICO

This .060" gauge canoe is made specifically for liveries and serious white-water enthusiasts. Straight center thwart standard.

QT-17 SS (SQUARE STERN)

Designed for use with small outboard, the full-size sprayrails on this canoe keep you dry and comfortable. Light enough so even one person can cartop. The ideal craft for hunting, fishing or paddling all in one.

QT-185 CL QUETICO

A favorite of racing enthusiasts, this fast yet very stable design makes for effortless cruising, and its lightweight makes it easy to portage.

QT-185 C QUETICO

In the long tradition of the famous line of **Alumacraft** Quetico canoes, this fast, yet very stable, model has extra length and added capacity allowing more comfort, especially for those trips lasting several days.

CO-17 CAMPER

This versatile canoe can be used in many ways. Using the unique wishbone transom which is above the waterline, outboards up to 4 hp. can be run. Yet, this 17-footer paddles with the ease of a double end canoe. Painted Dead Grass or Camouflage, it makes an ideal duck boat.

jon boats

FEATURES: Heavy-duty preformed extruded ribs extend up hull sides for greater strength • More and heavier ribs give added strength • Heavy-duty cast aluminum knee casting supports transom • Sturdy 1-3/8" thick transom with specially treated plywood inboard extending full width and depth of transom • Aluminum inboard motor pad • Seats with one inch front and back flange for easy securing of portable seats • Seats fitted to hull contour but not riveted to bottom • Gas-resistant foam flotation • Hydraulically-pressed keels and side stiffeners • Heavy-duty extruded gunnels • Transom drain plug assembly • made from 5052 alloy aluminum.

15' BASS by ALUMACRAFT

15' BASS PRO / 15' BASS DELUXE / 15' BASS STANDARD

Alumacraft's new line of bass boats are constructed of high quality 5052 aluminum.

All three models share a 15' rugged flat bottom • All-aluminum hull • 3 fold down seats • Fold down bow light • Stowaway stern light with bracket • Console steering • Gas resistant flotation floor and sides • Bow storage compartments • Rod holders • Twin shank bow eyes • Floor and decks carpeted.

The BASS DELUXE also includes: All-aluminum floor under heavy duty marine outdoor carpeting • 6" bow cleats • Locking storage • Trolling motor pad • Bow casting platform • Live well under driver's seat.

The BASS PRO, in addition to all of the above features, includes: adjustable seat pedestals • Casting platforms fore and aft.

semi-v fishing boats 1977

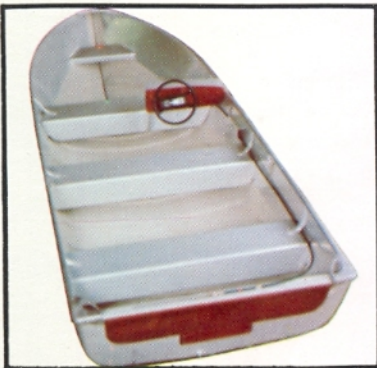

ALUMACRAFT'S "PREFORM PROCESS" is unique in the fishing boat industry. The two hull halves are stretch-formed so that the boat goes together without rivet stress, providing better performance from less horsepower.

Nearly 300,000 fisherman, hunters, and nature lovers have insisted on **ALUMACRAFT** quality. You shouldn't settle for second best.

CHECK THESE UNIQUE FEATURES: Solid oak inboard transom wood • One-piece keel and stem, preformed to hull contours and double-thick at points of wear — Self-draining preformed hull ribs • Wood/aluminum/wood transom sandwich to reduce motor noise and vibration • Solid cast-aluminum transom knee brace on all boats except models A & E • Self-draining aqueduct transoms on FD, F-9, F-11, and F-18 • Elevated all-aluminum seats • Grit surface floor paint • Nonglare satin finish • Oar storage brackets • Deep drawn transom.

ANCHOR CRADLE

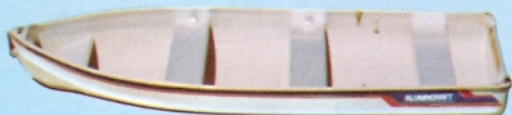

MODEL E CARTOPPER DELUXE

Our lightweight champion. Just 103 pounds of smooth handling fishing boat. Perfect for getting in and out of hard-to-reach lakes. And with optional Dead Grass or Camouflage paint, the Model E doubles as a duck boat.

MODEL R7 ANGLER

Here's a 12-footer with elbowroom. This broad-beamed, deep-hulled boat is perfect for the weekend fisherman.

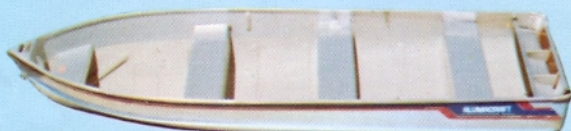

MODEL A RESORTER

Long a favorite at resorts, this rugged 14-footer weighs just 137 pounds. That's light enough to cartop.

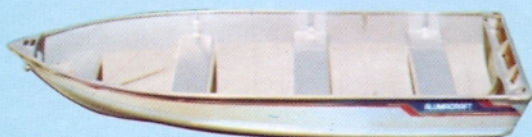

MODEL F7 FISHERMAN

One of the most popular fishing boats in the world (over 55,000 now in use). Its deep hull design keeps you dry even in rough water. Its safe easy handling design is perfect for both family and discriminating fishermen.

MODEL FD 15' FISHERMAN DELUXE

This all new boat is built to stand the challenge of season after season of hard use. Features Aqueduct transom tray which automatically catches and drains accidental backwash.

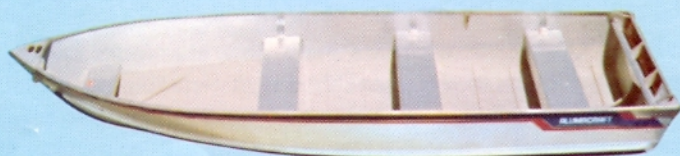

MODEL F9 LAKE MASTER

Built with the beam and hull depth serious fishermen demand. The soft chine, V-bottom hull smooths out rough, choppy water and makes Lake Master the ultimate Alumacraft 14' fishing boat. Choice of 15" or 20" transoms with Alumacraft's Aqueduct tray.

MODEL F-11 YUKON II

This sleek 16' beauty combines performance with ample size to give fishermen the ideal 16' aluminum fishing boat. Available with either 15" or 20" transom. Included as standard equipment is Alumacraft's famous Aqueduct tray which adds safety when encountering rough waters.

MODEL F-18 BIG LAKER

This all new model was designed for the serious big water fisherman. Its rugged construction can handle the bigger motors with ease. New aft seating (not shown in photo) now in production.
