

ALUMACRAFT[®] PAD VEE SERIES

Whether you choose the TROPHY or SPORTSMAN, these two new exclusive "PAD VEE" hull designs provide a new concept in boating excellence.

TROPHY 175

Featuring Alumacraft's new "Pad Vee" hull design, the TROPHY 175 not only provides exceptional performance but has the interior room and features that fishermen will really appreciate. Whether you fish Puget Sound, the Missouri River System, The Great Lakes, or Chesapeake Bay, you'll like how Alumacraft's new TROPHY 175 outperforms all others. The TROPHY 175 also makes an excellent water ski boat. Available in blue and earthtone.

SPORTSMAN 175

Alumacraft's new Pad Vee SPORTSMAN 175 is a center console fishing machine, not unlike those found in Florida waters. The SPORTSMAN 175 provides plenty of interior room plus a super large livewell. Built in the tradition of Alumacraft's quality, you will find that the SPORTSMAN 175 combines stability and rough water ruggedness into one very affordable package. Available with blue vinyl interior and blue or white upholstered seats.

LUXURY SERIES

Whether you are fishing a tournament or spending a week end with your family at your favorite lake; comfort, convenience and performance can be yours when you choose any one of the new Alumacraft LUXURY SERIES Semi-V's.

CLASSIC 16

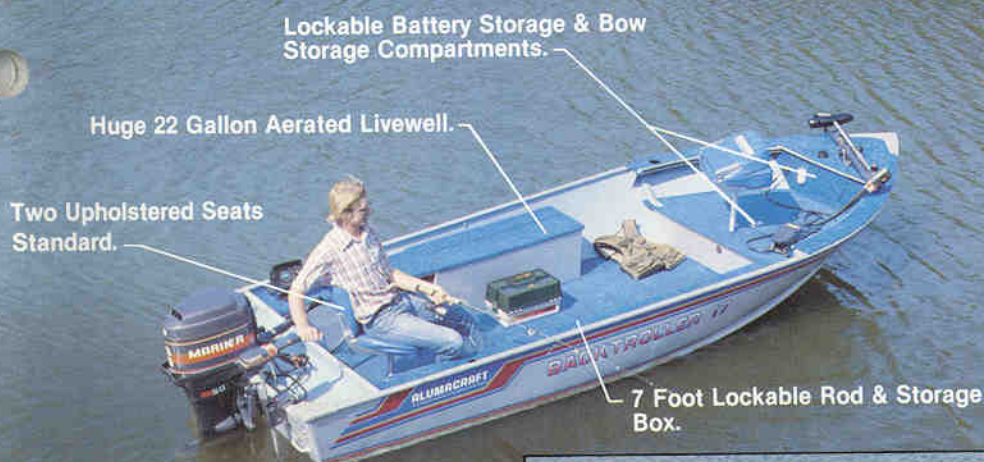

Here is 16 feet, four inches of rugged versatility—perfect for fishing or water-skiing. Three luxurious upholstered seats and marine carpeting give you maximum on-board comfort. When you add up all the special features included with this boat you will see why it's called the CLASSIC. Available with earthtone or blue interior.

BACKTROLLER 17

She's 17 feet, four inches of just plain the finest fishing boat money can buy. Whether you're after crappies, north-erns, walleyes, or trout, here is the boat that can do it all. The BACKTROLLER 17 is designed to be handled not only under full power, but holding that im-portant piece of structure even on the windiest of days.

Combine the roomiest interior in the industry with the kind of features that make even the most elaborate rigging a breeze and you'll soon know why the Backtroller 17 is the standard of ex-celence in a modern day fishing machine. Available in blue or earthtone.

The PRO 17 is a spacious fishing boat featuring both a bow and rear elevated fishing platform. Loaded with extras as indicated on the feature chart, you can see why the PRO 17 is the angler's choice. Available in blue or earthtone.

ALUMACRAFT® LUNKERSS

Quality, value, comfort, and convenience are all trademarks of the famous Lunker series of boats. Whether you pick the Lunker 14SS or its larger brother, the Lunker 16SS, you are picking a boat designed for fishing and packed with Alumacraft features.

Rated from 15 to 45 hp, the LUNKERS get you where you're going with ease and comfort. Whether you choose tiller or console steering, once your line hits the water you'll find the LUNKERS perform like real pros and that means more fish on the stringer. Features like luxurious marine carpeting, choice of seating arrangements, extra large splash wells, conveniently located livewells, and, of course, the spacious stretch-formed hulls that made Alumacraft the standard of the industry are just some of the reasons that the AFFORDABLE LUNKERS will be the choice of folks that fish in 1983.

Optional Lunker Steering

LUNKER & T14SF SERIES

LUNKER 14 & 16

Truly a pair of top value boats with loads of options that will allow you to make the LUNKER your "custom" fishing machine. Alumacraft LUNKERS are not only large and rugged but trailer easily so you can enjoy even those hard-to-get-to fishing spots very economically. The LUNKER is at home wherever fish are at home. (Pictured LUNKER 14)

T14SF

The new T14SF is smaller but includes the same carpeted flat floor, and live-well as found on the larger model Alumacrafts. A fine boat value for those who want a medium size, luxurious fishing boat, the T14SF can be easily made even more deluxe with the addition of upholstered seats, arm rests and other custom Alumacraft accessories.

ALUMACRAFT® TOTABLE SERIES

As the name implies, TOTABLES are the go anywhere, do anything line of Alumacraft Semi-V's. Rugged but light they are easy to trailer, even with today's smaller economy cars. For top performance, even a small horsepower outboard will do. From the economy car-topable T-12 to the rugged and versatile T-16XL, there is a perfect "TOTABLE" just for you.

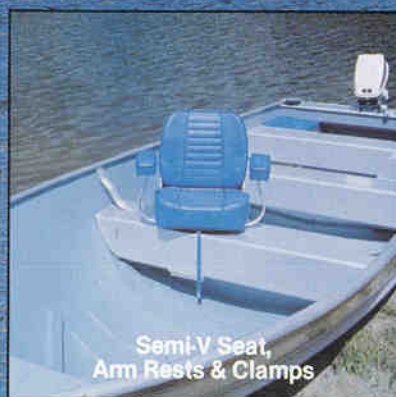

The sturdy T14XL and T16XL feature lots of staying power even under the toughest conditions. Big and roomy, with the quality features that mean years of trouble-free performance. At your option you can add console steering, upholstered swivel seats and even

a livewell. Standard features like heavy duty, cool ray aluminum seating, extra large splash wells, built in oar locks, and the quality Alumacraft stretched formed hull design, mean you'll get the most for your boating dollar.

TOTABLE SPECIFICATION CHART

...The Go Anywhere Champions

Semi-V Seat,
Arm Rests & Clamps

Pictured here are four of the most popular smaller fishing boats sold today—the T-12, T-14, T-12S, T-14S TOTABLES. The reason—they are quality built, stable and offer years of trouble-free service. All four boats are easy to car top or trailer. They are the right size to perform very well with minimum horsepower motors. By adding Alumacraft's comfortable upholstered seats and other accessories you can customize to your own fishing requirements.

ALUMACRAFT CANOES

15' QUETICO CRUISING

Designed for maximum performance and lightness, this canoe proves to be suitable not only on the lakes, but also for avid canoeists who require a highly maneuverable canoe in fast, winding streams and rivers.

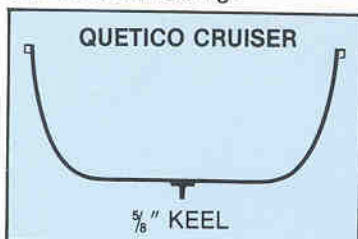

17' QUETICO CRUISING AND CRUISING LIGHTWEIGHT

Quetico canoes have become a legend in their own time. Not only the favorite canoe of many of the country's largest outfitters, this canoe is considered by many dedicated canoeists to be the finest, easiest paddling 17' aluminum canoe on the market today.

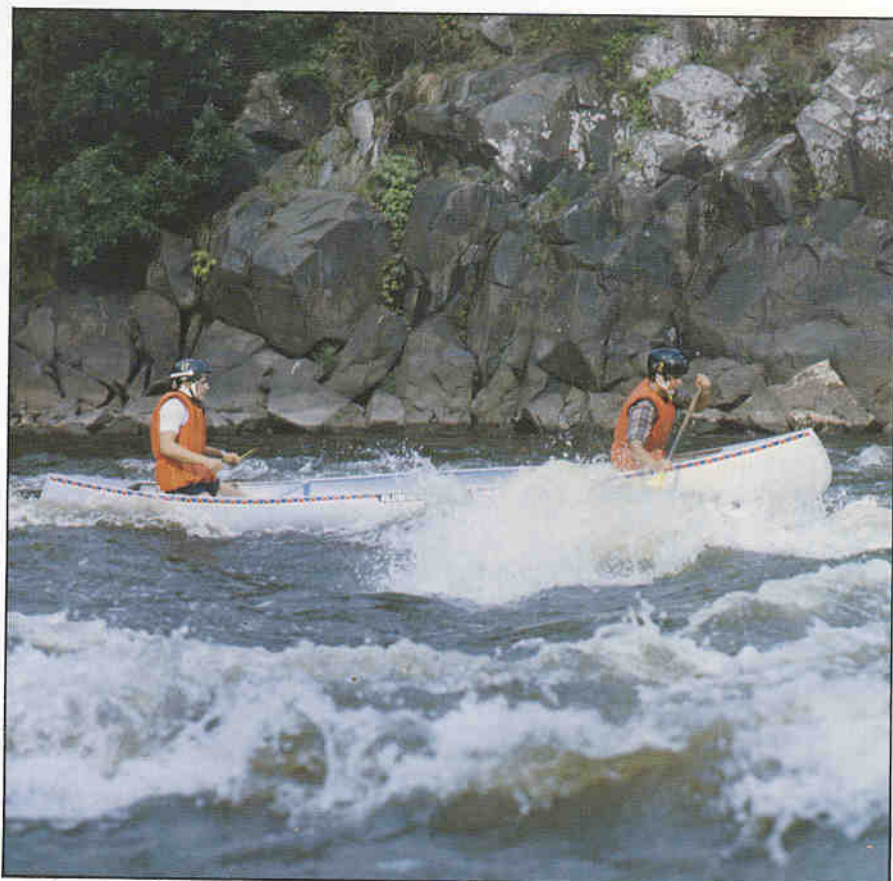

18'5" QUETICO CRUISING LIGHTWEIGHT CANOE

This consistent champion in aluminum racing events is designed with all the famous Quetico features. The extra length and added capacity allows more comfort and paddling ease, especially for trips lasting several days.

We offer four different Quetico cruising canoes. All Quetico cruising canoes are constructed from either 6061 or 6010 T-6 heat treated alloys and use a $\frac{5}{8}$ " deep T keel tapered to the stem at each end. This type of keel is designed to slow side drift, track very well and be very maneuverable and easy to handle, even in fast water. Recommended for both river and lake canoeing.

Designed for the white water enthusiast. The **QUETICO 17 WWR** is an extremely tough white water canoe constructed with .060 gauge 6010 T6 marine alloy. Its solid $\frac{3}{8}$ " deep flat keel with a side relief angle gives the canoe maximum ability to travel fast, shallow waters and glide over and around rocks and other fast water obstructions. Thousands of WWR's are in rental use from coast to coast.

PROFILE OF A QUETICO

Alumacraft Quetico Canoes are well known for their handsome styling, enhanced with the very colorful Indian trim. They are also acclaimed for their ease of paddling. One of the reasons for this paddling reputation is that the Quetico is designed with a flatter hull bottom than most other aluminum canoes. This design helps give the Quetico extremely good tracking characteristics without hindering maneuverability. The Quetico's long record of racing victories attests to the excellence of this hull design and is but one of the many reasons why you will have more fun with an easy paddling Alumacraft.

...More Than Just A Canoe!

17' CAMPER OUTBOARD CANOE

This versatile canoe can be used in many ways:

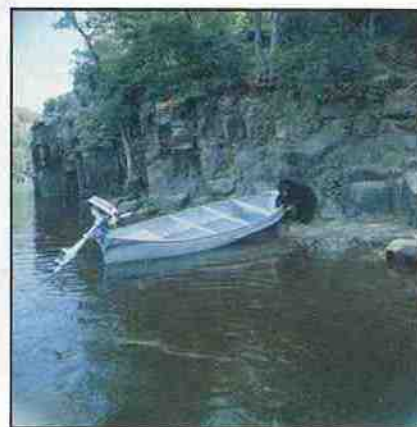

- Fish with it—you can use up to a 4 hp motor.
- Use it for paddling—It paddles as easily as a standard double end canoe.
- Great for hunting and camping excursions—The 17' CAMPER OUTBOARD has an extra large load capacity.

The reason for all this versatility in one canoe is because of its unique wish-bone design transom. It's an outboard above the waterline and a standard paddling model below. You are *NOT* bogged down with "transom water drag," which is a characteristic of other canoe designs which have full transoms below the waterline. The 17' CAMPER OUTBOARD is one of the most versatile canoes on the market today.

17' EXPLORER CANOE

An economy model canoe built in the Alumacraft tradition. The EXPLORER canoe is a well built, economy canoe that is perfect for less demanding family fun. The EXPLORER canoe stretch formed of 5052 marine aluminum. The cruising keel, thwarts, and gunnels are all specially designed extrusions. Although you will find the price of this exciting canoe to be low, the quality is high.

ALUMACRAFT MV BASS BOATS

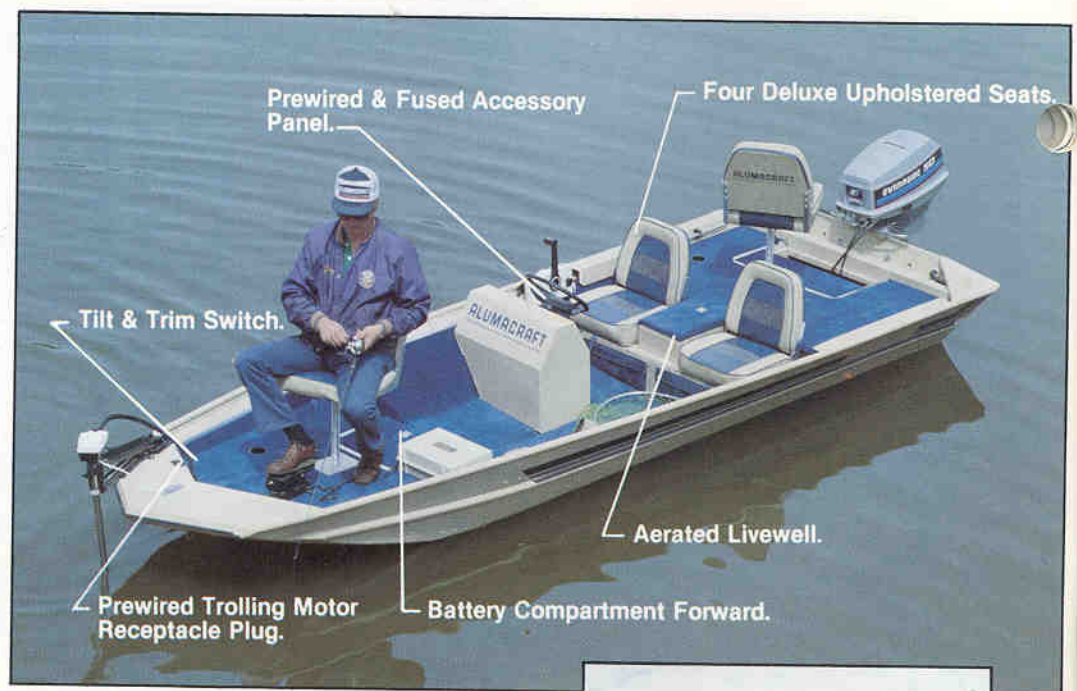

THE MV BANDIT®

The BANDIT® delivers what serious tournament bassers have been looking for. This sleek, light weight boat features a full modified V-hull (4 degrees at the transom) for a dry, smooth, quiet ride previously found only in heavier, more expensive boats. Loaded with deluxe features, the BANDIT® is the top of the aluminum bass boat class.

THE MV PRO

Alumacraft's MV PRO may be the best bass boat value in America. Rated for 60 hp the full modified-V hull of the MV PRO planes fast and easy plus provides a very stable ride. Engineered from the finest 5052 marine alloy, the MV PRO with all its features will provide you with years and years of the best fishing you have ever had.

MV BASS BOAT SPECIFICATIONS
