

**ALUMACRAFT®**

1989

AMERICA'S  
FIRST CHOICE  
IN  
FISHING  
BOATS

# WHEN YOU BUY ALUMACRAFT, YOU GET EXACTLY WHAT YOU WANT.

You aren't forced to take a preselected factory package when you buy Alumacraft. Unlike some other boat manufacturers, we don't make you buy a specific boat with a pre-selected motor, trailer, accessories, etc.

Instead, you and your dealer *custom design* the perfect boat package for your kind of fishing or pleasure boating. You purchase the boat that best

meets your needs. You select the motor that best accommodates the boat; neither over-powered nor under-powered. You match a trailer to your boat for the trips you normally make. And you choose just the accessories you want to add the perfect finishing touches to a *custom boat package* only you could have designed.

At Alumacraft, we believe that giving the customer what he wants is the best way to do business. No wonder fishermen have made Alumacraft America's first choice in fishing boats.

## THE ALUMACRAFT VEE DIFFERENCE.

**URETHANE FINISH**...super tough, high gloss finish resists corrosion and wear for years of trouble free good looks.

**CENTER KEEL**...one piece extending from the transom area to the top of the bow for greater strength. Reinforced at the point of wear with  $\frac{1}{4}$ " of solid aluminum to handle years of abrasive beach landings.

**HIGHEST GRADE MARINE ALLOYS**...used to greatly increase strength, puncture resistance and wear.

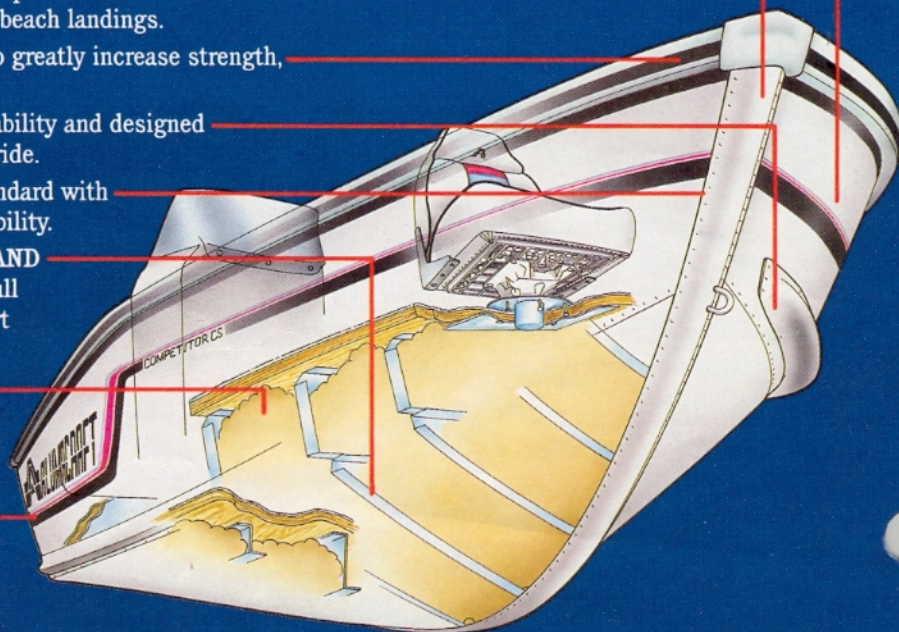

**SPRAYRAILS**...strategically positioned for stability and designed to really deflect water for the driest possible ride.

**SPOT WELDED AND RIVETED SEAMS**...standard with most models for extra durability and dependability.

**HEAVY GAUGE ALUMINUM TRANSVERSE AND LONGITUDINAL FRAMING**...formed to the hull bottom to provide maximum structural support is standard on most models.

**FOAM IN PLACE FLOTATION**...meets and exceeds Coast Guard requirements and provides for a quiet ride and greater structural integrity.

**ALUMINUM CLAD TRANSOM**...wood is dipped in preservative to help prevent deterioration and clad on both sides with thick aluminum to eliminate maintenance, minimize vibration and noise levels, and assure dependable performance.

## WHEN YOU BUY ALUMACRAFT, YOU GET UNSURPASSED QUALITY AND VALUE.

Here are ten more reasons AlumaCraft is your best buy.

1. Aluminum covers and lids are standard on most boats for added strength and longer life.

2. Custom, high-tech instrument packages are available on many models to give you the ultimate in boating and fishing pleasure.

3. Superior-grade Olefin carpet, with unsurpassed resistance to ultraviolet

light, retains its rich color and good looks for years.

4. Extra large livewells provide all the capacity you need for trophy size fish.

5. High-profile seats utilize high-density foam for greater comfort plus top-grade vinyl upholstery and molded plastic bottom for maximum durability.

6. Stylish molded control panels are mounted on heavy-gauge aluminum frames for maximum

strength.

7. Dry storage compartments are standard on some models.

8. Locking compartments provide secure storage on many models.

9. Built-in gas tanks on some models provide greater cruising ranges and more usable floor space.

10. High-quality materials and accessories ensure the AlumaCraft tradition of value.

## BASS BOATS FOR THE SERIOUS FISHERMAN.

**URETHANE FINISH**...super tough, high gloss finish resists corrosion and wear for years of trouble free good looks.

**MODIFIED VEE HULL**...sleek rakish vee-bow and 5 degree dead rise at the transom (available on all bass boats and modified-vee jon boats) provides a smoother ride and better handling characteristics.

**HEAVY GAUGE ALUMINUM PLATES**...under flooring provide extra holding power for seat-base installation.

**U-SHAPED KEEL**...disperses the external pressures more evenly for superior hull strength and durability.

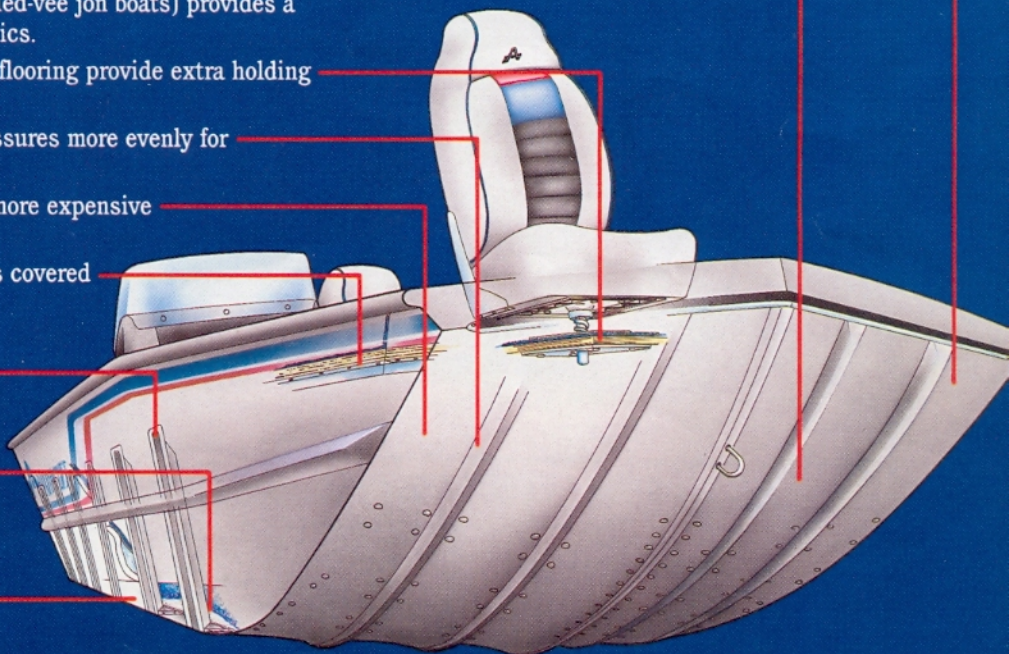

**TOUGH HULL**...of 5052 marine alloy. A little more expensive but a lot stronger and more durable.

**CASTING PLATFORM**...tough, treated wood is covered with superior grade, Olefin marine carpeting for years of use.

**PREFORMED, EXTRUDED RIBS**...far stronger than stamped ribs. You can depend on them, especially when the going is rough.

**ALUMINUM INNER FLOOR**...an integrated design feature that adds strength, yet is lightweight, and lessens future maintenance problems.

**FOAM IN PLACE FLOTATION**...meets and exceeds Coast Guard requirements and provides for a quiet ride and greater structural integrity.

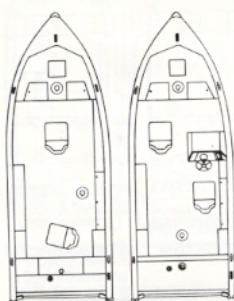

# DOMINATOR SERIES

"If you're looking for a walleye boat that works on any water on any day, you've just found it. Alumacraft has put it all together in the Dominator. The big 24-gallon, aerated livewell keeps your bait and fish fresh all day. A 24-gallon built-in gas tank, lockable storage and rod locker handle all your gear for any type of trip. Best of all, you ride dry and smooth in the comfort of soft, upholstered seats."

Steve Felleggy,  
Professional  
Fisherman &  
Guide

Custom Instrument Console

"Since I'm into my fifth Alumacraft boat, I think I'm qualified to say a word or two about the Classic Deluxe. First and foremost, it's a great family boat. There's plenty of open space so you're not crowded and plenty of seating to keep everybody comfortable. For the fisherman, rod holders keep your "weapons" at the ready and tangle-free. Want to ski? The Classic Deluxe handles up to a 75-horse engine and the sharp-looking steering console gives you all the control you need."

# BACKTROLLER SERIES

"With the Backtroller, Alumacraft has created one of the most versatile fishing boats ever. It offers the fisherman ideal control when you're backtrolling for walleye or working the bow casting platform for bass. There's plenty of room to help you handle any fishing situation. Both the 14' and 16' models feature rod storage and the 16' offers additional lockable storage.

# LUNKER SERIES

"If you're out to catch fish, make sure you're fishing in a Lunker. I've been in a lot of boats in my time and this series from Alumacraft is really designed for catching fish. You can choose models with upholstered pedestal seats, bench seats or both, to suit the way you like to fish. You get handy livewells (in

every model) and lockable storage. Plus, a host of options that lets you appoint your boat to perfectly match your fishing style."

# VALUE/TOTABLE SERIES

"When you run an instructional fishing camp like Camp Fish, you look for boats that not only stand up to rough, frequent use, you also want a boat that offers stability and easy handling. These Alumacraft boats really fill the bill. Their spacious interiors and handling characteristics make them perfect boats for adults and kids. And I like the fact that they are so easy to maintain."

Reggie Thiel,  
Director,  
Camp Fish

# DEEP VEE BASS BOAT SERIES

"This is high performance bass fishing at its best. Alumacraft builds deep vee bass boats that get you to your favorite bass haunts fast and in style. Both the Phantom and the Bandit V170 are class acts with strategically placed livewells including a recirculating "tournament" livewell. You'll also find plenty of lockable and dry storage for just about any gear you think you need to tie into a trophy. Alumacraft's lightweight, aluminum construction delivers more "kick," speed, economy and performance than a comparable fiberglass boat."

# MODIFIED VEE BASS BOAT SERIES

"I've been fishing bass tournaments since 1976 and I've learned a lot about what makes a great bass boat. Alumacraft's Super Bandit offers features that are a must; like dry storage, a comfortable console with quality steering, a well-designed livewell system, unobstructed deck and floor space. This boat runs great too; gets on plane with ease and little bow rise. In fact, I

when I opened Tom's Marine, I made it my number one line."

# MODIFIED VEE BASS BOAT SERIES

"Here are two boats that any beginning bass fisherman will take a shine to. They are economical and loaded with features that will make your bass fishing a real pleasure. Modified-vee, shallow-draft hulls deliver a super smooth ride and quick plane. Tough, riveted, marine aluminum stands up to the obstacles often found in favorite bass holes. Built rugged but with upholstered seats to keep you comfortable. If you're just starting to fish for bass, get started right in an Alumacraft."

# MV JON BOAT SERIES

"I've been using Alumacraft boats all over North America for over 30 years. In fact, I helped pioneer Alumacraft jon boats. These are tough boats you can do just about anything with from fishing and duck hunting to working. You can't beat their stability and maneuverability in shallow waters. I said these boats were tough and they are, thanks to the 5052 marine aluminum alloy which gives you great puncture protection and dent resistance for years."

# JON BOAT SERIES

"I took my Alumacraft jon on a 2500-mile adventure trip on the Mississippi and Ohio Rivers. And it's ready to go another 2500. My Alumacraft jon held up to some of the roughest, toughest stretches of navigable river water in the country. Rocks, submerged trees and dead-heads were no match for this tough, marine aluminum hull. My W1440 jon held up superbly where others failed."

# WHY ALUMACRAFT IS AMERICA'S PREMIER CANOE.

- **Overlap design** . . . each side of the hull is preformed, overlapped on the center seam, and spot-welded for greater strength.
- **Flat bottom** . . . a flat bottom provides greater stability and easier paddling than a rocker bottom design.
- **Spotwelding** . . . aircraft-tough spotwelds on ribs, gunwales and center seam eliminate rivet shearing, drag and leakage.
- **Stronger stems** . . . made of .090 gauge solid aluminum, they're thicker and stronger to stand up to rocks, gravel and other obstructions.
- **6010 Marine alloy** . . . lightweight, this remarkable space age alloy is heat treated for greater durability and resistance to punctures and wear.
- **Plus** . . . built in carrying yoke on most models, gas resistant foam flotation, rugged roll seat design, attractive decal, and stainless steel tie-down eyelets.

## CANOES

"Take it from guys who have been outfitting people for over 15 years, you can't beat the Alumacraft canoe. They build 'em to take a beating, and believe us in this business they do. Plus, they're easy to paddle and are stable on the water, and their light weight makes portaging easier. They really keep our customers happy. Alumacraft builds seven different models, too. One's just right for the kind of canoeing you like to do."

Console Storage

Custom Instrument Console

"Since I'm into my fifth Alumacraft boat, I think I'm qualified to say a word or two about the Classic Deluxe. First and foremost, it's a great family boat. There's plenty of open space so you're not crowded and plenty of seating to keep everybody comfortable. For the fisherman, rod holders keep your "weapons" at the ready and tangle-free. Want to ski? The Classic Deluxe handles up to a 75-horse engine and the sharp-looking steering console gives you all the control you need."

# COMPETITOR SERIES

"Man, do I love running my Competitor. If you're a serious fisherman, you're going to love it too. You've got all that usable floor space to let you play those lunkers right into the net and then into that big, 24-gallon livewell. Plenty of room in there for trophy fish. Lots of lockable storage, even for electronics, keeps everything at your finger tips but not under foot. And talk about handling and stability, Alumacraft has done a superior job with this boat."

# DOMINATOR SERIES

"If you're looking for a walleye boat that works on any water on any day, you've just found it. Alumacraft has put it all together in the Dominator. The big 24-gallon, aerated livewell keeps your bait and fish fresh all day. A 24-gallon built-in gas tank, lockable storage and rod locker handle all your gear for any type of trip. Best of all, you ride dry and smooth in the comfort of soft, upholstered seats."

# JON BOAT SERIES

"I took my Alumacraft jon on a 2500-mile adventure trip on the Mississippi and Ohio Rivers. And it's ready to go another 2500. My Alumacraft jon held up to some of the roughest, toughest stretches of navigable river water in the country. Rocks, submerged trees and dead-heads were no match for this tough, marine aluminum hull. My W1440 jon held up superbly where others failed."

# MODIFIED VEE BASS BOAT SERIES

"Here are two boats that any beginning bass fisherman will take a shine to. They are economical and loaded with features that will make your bass fishing a real pleasure. Modified-vee, shallow-draft hulls deliver a super smooth ride and quick plane. Tough, riveted, marine aluminum stands up to the obstacles often found in favorite bass holes. Built rugged but with upholstered seats to keep you comfortable. If you're just starting to fish for bass, get started right in an Alumacraft."

# MV JON BOAT SERIES

"I've been using Alumacraft boats all over North America for over 30 years. In fact, I helped pioneer Alumacraft jon boats. These are tough boats you can do just about anything with from fishing and duck hunting to working. You can't beat their stability and maneuverability in shallow waters. I said these boats were tough and they are, thanks to the 5052 marine aluminum alloy which gives you great puncture protection and dent resistance for years."

# MODIFIED VEE BASS BOAT SERIES

"I've been fishing bass tournaments since 1976 and I've learned a lot about what makes a great bass boat. Alumacraft's Super Bandit offers features that are a must; like dry storage, a comfortable console with quality steering, a well-designed livewell system, unobstructed deck and floor space. This boat runs great too; gets on plane with ease and little bow rise. In fact, I

when I opened Tom's Marine, I made it my number one line."

Tom Buckingham,  
Owner, Tom's  
Marine, Tournament  
Bass Fisherman

# VALUE/TOTABLE SERIES

"When you run an instructional fishing camp like Camp Fish, you look for boats that not only stand up to rough, frequent use, you also want a boat that offers stability and easy handling. These Alumacraft boats really fill the bill. Their spacious interiors and handling characteristics make them perfect boats for adults and kids. And I like the fact that they are so easy to maintain."

Reggie Thiel,  
Director,  
Camp Fish

Approx. Wt./Lbs.	255/260	235/240	161	140	129	115

<sup>1</sup> Maximum equivalent gauge is a calculation based on empirical data developed by the automotive industry and the S.A.E.'s structural requirements to compare resistance to denting for various material and thicknesses. For further information, contact Alumacraft Boat Company's Engineering Department. Color: Quicksilver Grey hull with Blue interior.

# TROPHY CUDDY

"I may be a little partial because I helped design this beauty. But, frankly, I think the 220 Cuddy is the finest big water boat around. It'll handle any big water fishing whether you're talking the coastal waters, the Great Lakes or a Dakota reservoir. We've put a lot of fishing room in it and plenty of functional features like in-dash electronics and easy mounting of downriggers. And the cabin can make fishing comfortable on some of those cold, rough days when most fishermen are in port."

Butch Furtman,  
Professional Great  
Lakes Fisherman  
& TV Show Host

Livewell

"When I first drove this new Alumacraft Trophy, the things that impressed me the most were its excellent handling, smooth ride and great get-up-and-go. Plus there are plenty of features that make fishing or boating a real pleasure. A choice of upholstered pedestal or sleeper seats or both, depending on which model suits you best. Jump seats aft. A 30-gallon aerated livewell. Two lockable rod storage compartments. Even a Custom Instrument Package that includes an optional AM-FM radio with cassette."

Whitey Klohs  
Boat Dealer

Trophy 190 I/O

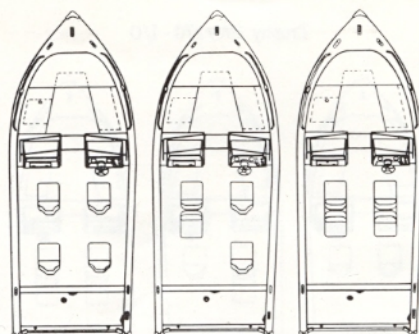

# TROPHY SERIES

"When you've got miles of open water beckoning, here are two boats with your choice of interiors that I think will make your fishing or boating experience something extra special. The smooth riding hull and upholstered seating keep you comfortable on the roughest water. The walk through windshield gives you easy access fore and aft, while the easy-to-clean, plush marine carpeting and lots of storage help you keep these beauties looking shipshape."

Bud Grant,  
Former Head  
Coach, Minnesota  
Vikings

# BACKTROLLER SERIES

"With the Backtroller, Alumacraft has created one of the most versatile fishing boats ever. It offers the fisherman ideal control when you're backtrolling for walleye or working the bow casting platform for bass. There's plenty of room to help you handle any fishing situation. Both the 14' and 16' models feature rod storage and the 16' offers additional lockable storage.

# DEEP VEE BASS BOAT SERIES

"This is high performance bass fishing at its best. Alumacraft builds deep vee bass boats that get you to your favorite bass haunts fast and in style. Both the Phantom and the Bandit V170 are class acts with strategically placed livewells including a recirculating "tournament" livewell. You'll also find plenty of lockable and dry storage for just about any gear you think you need to tie into a trophy. Alumacraft's lightweight, aluminum construction delivers more "kick," speed, economy and performance than a comparable fiberglass boat."

Shag Shahid,  
World's Trick  
Casting Champion

# WHY ALUMACRAFT IS AMERICA'S PREMIER CANOE.

- **Overlap design** . . . each side of the hull is preformed, overlapped on the center seam, and spot-welded for greater strength.
- **Flat bottom** . . . a flat bottom provides greater stability and easier paddling than a rocker bottom design.
- **Spotwelding** . . . aircraft-tough spotwelds on ribs, gunwales and center seam eliminate rivet shearing, drag and leakage.
- **Stronger stems** . . . made of .090 gauge solid aluminum, they're thicker and stronger to stand up to rocks, gravel and other obstructions.
- **6010 Marine alloy** . . . lightweight, this remarkable space age alloy is heat treated for greater durability and resistance to punctures and wear.
- **Plus** . . . built in carrying yoke on most models, gas resistant foam flotation, rugged roll seat design, attractive decal, and stainless steel tie-down eyelets.

## CANOES

"Take it from guys who have been outfitting people for over 15 years, you can't beat the Alumacraft canoe. They build 'em to take a beating, and believe us in this business they do. Plus, they're easy to paddle and are stable on the water, and their light weight makes portaging easier. They really keep our customers happy. Alumacraft builds seven different models, too. One's just right for the kind of canoeing you like to do."
