

FROM GENERATION TO GENERATION
THE CHOICE IS ALUMACRAFT

WHY ALUMACRAFT IS AMERICA'S PREMIER CANOE.

- **Overlap design** . . . each side of the hull is preformed, overlapped on the center seam, and spot-welded for greater strength.
- **Flat bottom** . . . a flat bottom provides greater stability and easier paddling than a rocker bottom design.
- **Spotwelding** . . . aircraft-tough spotwelds on ribs, gunwales and center seam eliminate rivet shearing, drag and leakage.
- **Stronger stems** . . . made of .090 gauge solid aluminum, they're thicker and stronger to stand up to rocks, gravel and other obstructions.
- **6010 Marine alloy** . . . lightweight, this remarkable space age alloy is heat treated for greater durability and resistance to punctures and wear.
- **Plus** . . . built in carrying yoke on most models, gas resistant foam flotation, rugged roll seat design, attractive decal, and stainless steel tie-down eyelets.

People Capacity	12/1600 lbs.
Overall Weight	1660 lbs.
Maximum HP	75

IMPORTANT: Some large HP out-boards may exceed maximum tilt heights for these boat models. Check with manufacturer.

Color Options: Gray exterior with Teal interior, White exterior with Blue interior.

12 great reasons to buy an Alumacraft pontoon.

1. The best pontoons are strong and sturdy the way we build them. We start with .080 gauge marine aluminum to ensure the highest quality. Then we form each pontoon into a 23" U-Shape to provide maximum performance and floatation characteristics. A special urethane foam is placed into each pontoon for added strength and durability.
2. The nose cones are filled with urethane foam for increased strength and impact resistance and have been specially engineered to minimize damage from ramming or beaching.
3. Heavy gauge extruded aluminum cross channels on 16" centers (for most models) provide stable support for the deck. The deck is fastened in place with bolts and locking nuts. The Fish N' Cruise 200 and Fish 200 have screwed down decks.
4. The decks are 3/4" superior grade pressure treated, weather-proofed plywood. Every seam and every cross member is sealed, and the entire

deck is covered with a high quality marine carpet for beauty and durability.

5. Furniture ensembles feature top quality, marine upholstery. Marine grade vinyls resist harmful ultra-violet light that can deteriorate other vinyls. A special corrosion resistant monel staple is used to fasten upholstery.
6. Deck railings are constructed of 1 1/4" square aluminum for greater strength and durability. All railings are fully anodized to protect against unsightly oxide rub-off. All railings have fully rounded corners for enhanced appearance and added safety.
7. The deck edges are encased with aluminum extrusions, and all outside corners of the pontoon deck are protected with heavy-duty aluminum corner castings.
8. Three gates are standard on every Alumacraft pontoon for easy access when boarding or unboarding. The front gate is wheelchair accessible.

9. Aluminum clad transoms are standard on most models. The wood infrastructure is dipped in preservative to help prevent deterioration and then clad on both sides with thick aluminum to eliminate maintenance, minimize vibration and noise levels, and assure dependable performance.
10. A special custom high tech molded steering console is standard on all models for convenience and styling.
11. Loads of special accessories and options are available to make your boating a real pleasure. Custom Instrument Packages, and Custom Accessory Packages, plus boarding ladders and much more are offered to let you personalize your pontoon.
12. A special Limited 2-Year Warranty assures you of fun-filled worry-free days. All Alumacraft products are NMMA Certified and all ratings comply with the Federal Boat Safety Act of 1971. Alumacraft has been building watercraft since 1946 so you know we do it right.
