SEMI-VEES • BASS BOATS • JON BOATS • CANOES

ALUMACRAFT®

...built tough to last and last

The only similarity between the aluminum boats we started building in 1946 and the boats we build today is the quality we build into them. That's why you see so many Alumacraft boats from the 60's, 50's and even the 40's still in use. It's just plain hard to wear out an Alumacraft boat.

For 47 years we've done just one thing: build aluminum boats. We, and thousands of Alumacraft boat owners agree with us, that we build the best aluminum boat you can buy. Your hardest decision will be choosing just which model is right for your family. We know that every angler and his or her family has different needs; that's why we build more than 70 different models.

Here's what you can expect when you purchase an Alumacraft boat.

- A boat that is handcrafted with pride. Our plants in St. Peter, Minnesota and Arkadelphia, Arkansas are in rural communities with a strong sense of commitment and pride in the boats they build.
- Our quality really shines when it comes time to trade up or sell your boat. You'll find that a used Alumacraft has high demand and carries a higher resale value.

- A boat that's loaded with the right features for pleasurable boating; from comfortable seats, and European style consoles with easy to read instruments to conveniently located livewells and lots of storage compartments.

- Value packed optional accessory packages to help you build your perfect boat package.

You'll appreciate the fine quality features that make Alumacraft the premier aluminum boat line.

- 1 Urethane Finish is super tough, high gloss and resists corrosion and wear for years of trouble free good looks.
- 2 Center Keel One piece extending from the transom area to the tip of the bow for greater strength. Reinforced at the point of wear with 1/4" of solid aluminum to handle years of abrasive beach landings.
- 3 Highest Grade Marine Aluminum Alloys are used to greatly increase strength, puncture resistance and wear.

- 4 Sprayrails are strategically positioned for stability and specially designed to deflect water for the driest possible ride.
- 5 Aluma Frame Construction Heavy gauge aluminum transverse and longitudinal framing is formed to the hull bottom to provide maximum structural support. Standard on most models.
- 6 Foam in Place Floatation meets and/or exceeds Coast Guard requirements and provides for a quiet ride and greater structural integrity.
- 7 Aluma Clad Transom Wood is dipped in preservative to help prevent deterioration and clad on both sides with thick aluminum to eliminate maintenance, minimize vibration and noise, and assure dependable performance.
- 8 Aluma Plate Bow Reinforcement A dual aluminum plate bow adds hull strength and integrity. Trophy, Competitor, Dominator, Phantom series plus the Super Bandit, Maverick, Angler and Crappie Pro.

and last and last and last and last and last a

- 9 Modified Vee Hull** A sleek rakish vee-bow and 5 degree rise at the transom (bass boats and modified-vee jon boats) provides a smoother riding and better handling boat.
- 10 Heavy Gauge Aluminum Plates** under the flooring provides extra holding power for the seat-base installation.
- 11 Casting Platform** A specially treated plywood platform for long life is covered with superior grade, Oelfin marine carpeting to last.
- 12 MV Bass Boat Casting Decks** Heavy duty aluminum casting decks provide superior performance and long life.
- 13 Preformed, Extruded Ribs** are stronger than stamped ribs. You can depend on them, especially when the going is rough.
- 14 Aluminum Inner Floor** This integrated design feature adds strength, yet is lightweight, and lessens future maintenance.
- 15 Riveted Construction** Special heat-treated and hardened aircraft type rivets assure durability and dependability.

- 16 Aluminum Covers and Lids** with piano style hinges hold their shape and are stronger and lighter for long life.
- 17 Polyethylene Livewell Liners** help keep your catch fresh. Some models feature insulation for even greater catch preservation.
- 18 Space-Saving, Built In Gas Tanks** are standard on many models.
- 19 Customized, High Tech Instrument Packages** give you greater control and information for safer boat operation.
- 20 Special Oversized Rivets** are used to attach floors to interior frames for superior holding power. They are stronger and more durable than screwed down floors.
- 21 All Alumacraft Boats are National Marine Manufacturers Association (NMMA) Certified** and all ratings meet or exceed the requirements of the Federal Boat Safety Act of 1971 to assure you the utmost in boating pleasure.

WHY ALUMACRAFT IS AMERICA'S PREMIER CANOE.

- **Overlap design** . . . each side of the hull is preformed, overlapped on the center seam, and spot-welded for greater strength.
- **Flat bottom** . . . a flat bottom provides greater stability and easier paddling than a rocker bottom design.
- **Spotwelding** . . . aircraft-tough spotwelds on ribs, gunwales and center seam eliminate rivet shearing, drag and leakage.
- **Stronger stems** . . . made of .090 gauge solid aluminum, they're thicker and stronger to stand up to rocks, gravel and other obstructions.
- **6010 Marine alloy** . . . lightweight, this remarkable space age alloy is heat treated for greater durability and resistance to punctures and wear.
- **Plus** . . . built in carrying yoke on most models, gas resistant foam flotation, rugged roll seat design, attractive decal, and stainless steel tie-down eyelets.
