**ALUMACRAFT**<sup>®</sup>

BUILDING CONFIDENCE, ONE BOAT AT A TIME

Alumacraft Boats—Hand assembled using the finest materials for more than 50 years.

# Alumacraft Construction

## HIGHEST GRADE MARINE ALUMINUM

There is none better. An exceptional blend of strength, puncture resistance and long life.

## FOAM-IN-PLACE FLotation

Gas-resistant poured foam fills every crevice, increasing hull strength, quieting the ride and adding stability.

## ALUMA CLAD TRANSOM

Treated wood is clad inside and out with thick aluminum to minimize vibrations, quiet the ride and eliminate maintenance.

## TRANSOM DOUBLE PLATE

An extra .080" plate riveted to the Aluma Clad Transom adds protection to this critical part of the hull.

## ALUMA-FRAME CONSTRUCTION

Heavy gauge aluminum transverse and longitudinal framing is formed to optimal hull bottom shape. Provides maximum structural support with minimum weight. Standard on most models.

## GAS TANKS

Space-saving built-in tanks, standard on many models, are positioned for optimum balance, performance and ride. Built-in reserve on Tournament Pro Series and Trophy 185.

## SPRAY RAIL

Large Reverse Dispersal Wave Action Spray Rail is contoured to deflect splash down and away. Provides a drier ride even in rough water.

## ONE-PIECE BOTTOM

The entire boat bottom is made from a single piece of aluminum. A one-piece bottom is stronger and has greater structural integrity than pieced-together bottoms.

## RIVETED CONSTRUCTION

Special heat-treated and hardened aircraft-grade rivets ensure durability and long life. Oversized rivets are utilized in stress areas instead of drilling more holes and doubling up with smaller rivets.

## SEAT BASE PLATES

Heavy gauge aluminum base plates under the floor provide a rock-solid platform for seat base mounts.

## LIVWELL LINERS

Protective polyethylene liners with rounded edges to help keep your catch fresh. Some models are further insulated for even greater fish preservation.

## CASTING PLATFORM

Specially treated marine plywood platform is covered with high quality Olefin marine carpeting to shrug off weather.

## REINFORCED CENTER KEEL

One-piece, preformed, extruded keel extends from bow tip to stern providing a backbone of strength and protection. Engineered with 1/4" solid aluminum at wear points.

## ALUMA PLATE TWIN PLATING

Adds an extra layer of strength to critical bow areas on Trophy, Tournament Pro, Phantom, Magnum, Dominator, MV Super Bandit, MV Maverick, MV Angler and Crappie Pro models.

## 2XB HULL

The hull that redefined the standard for durability. Twin aluminum plates run the entire length of the boat bottom. Trophy, Tournament Pro and Phantom models.

## INSTRUMENT PACKAGES

Customized long-life, high-tech instrument packages present detailed information in clear view for greater control and safer boat operation.

## URETHANE FINISH

The best finish available—base coat with clear coat matches current automotive colors. Tough, high-gloss, resists chipping, corrosion and wear for years of brilliance.

## EASY-RELEASE PEDESTAL

Now it's easy to move your seat. New design pedestal releases easily from base with the push of a button. No more clumsy kicking and twisting.

## HAND HOLDS

Your passengers find one everywhere they need one—in all running positions.

WHY THE 2XB HULL BEATS THE COMPETITION 2 TO 1

# 2 x Bottom = 2XB

## MORE SOLID RIDE

Everyone who drives a 2XB Hull boat comes back with the same exuberant response: "this really is solid, you can actually feel it". If you're not sold on it, you haven't driven one.

## BETTER HANDLING

The double bottom is not only a stronger design, it's also a truer design. Even under brutal conditions the integrity of the hull is not compromised—no flexing, no subtle changes in shape that can affect handling. The boat performs as it is supposed to even in rough conditions where handling is extra critical.

## QUIETER OPERATION

The 2XB Hull is quieter than other hulls. The extra plate and solid construction dramatically reduces sound and vibrations that transmit from below. So go ahead and start up a conversation, we're listening.

## MORE DURABLE CONSTRUCTION

Two aluminum plates hold up better than a thinner single plate. If you're the kind of driver who pushes it, even in heavy seas, this is the hull you want. The 2XB is designed with enough strength to tame the worst conditions.

## 2XB HULL

The experts have been talking about the 2XB Hull since it was introduced two years ago. The durability benefits of a twin-plated bottom are obvious, but the solid-feel, crisp handling and quiet operation leaves a big impression on everyone who drives it.

It's one of the safest crafts you can buy. The U.S. Coast Guard operated Trophy 185s on Lake Superior for more than 10 years. The 2XB Hull tames rough seas and gracefully takes you from fishing to skiing to cruising. The impressive depth and beam of the Trophy provides uncompromising confidence, security and comfort. For your family, your clients, your friends and yourself, there is no better way to show you care.

TOURNAMENT PRO 195CS

**Johnson**  
OUTBOARDS

Pre-rig with Johnson power for peak performance.

You said you wanted a boat like the pros use. You said you were ready to move up to the top level.

Well, this is it. The boat that has captured the awe of tournament fishermen across the country. They like it because it handles and fishes like a dream. They like it because it's built on the nearly-indestructible 2XB Hull. They like it because it gives them top-of-the-line tournament fishing features, comfort and performance. They like it for all the reasons you will.

SIMPLICITY, SIMPLICITY, SIMPLICITY

# Value/Totables

As honest and dependable as a summer day is long, these beauties are pure workhorses. No bells, no whistles, no frills. They are the most unpretentious boats on the water. Whether bouncing along in the back of a pickup or lined up on a resort dock, our V&T models are pictures of functional beauty. There's a reason you see them on nearly every lake across North America. They last and last and last.

THE STRONG SILENT TYPE

# Canoes

They glide through the water without a sound. Quality construction has made these America's premium canoes. Lightweight and rugged, the flat bottom aluminum hull is more stable and easier to paddle than a rocker bottom. We spot weld ribs, gunwales and the center seam to eliminate rivet drag. Stems are made from extra-strong solid aluminum and the tie down eyelet is 100% stainless steel. Just a few of the reasons you see them stacked on outfitter's trailers around the world. If you need a canoe that will both perform and stand up to the rigors of the outdoors, you need an Alumacraft.

1999 Alumacraft

HIGH PERFORMANCE WITHOUT THE HIGH PRICE

Fish Hunter  
NEW FOR 1999

**ALUMACRAFT** BOAT CO.

BUILT TO CATCH FISH, NOT HOT DOGS.

# Predator • Super Bandit • Maverick • Phantom

Predator 17AW Deluxe

Pre-rig with Mariner power  
for peak performance.

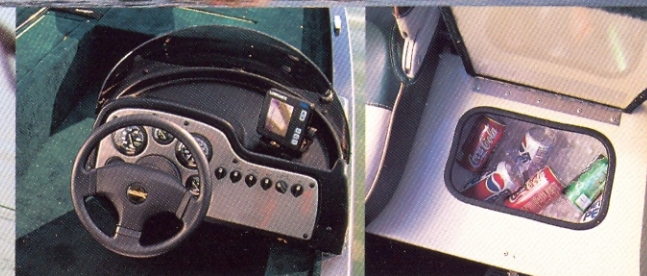

**2XBHULL**

Twin plates cover the entire boat bottom.

**Phantom V170**

RIGHT: The all-welded Predator is not only tough, it's fast, affordable and fun.  
MIDDLE: Predator console puts you in firm control.  
FAR RIGHT: Ice chest in the Predator and Bandit does double-duty as dry storage.

**Predator 17AW Deluxe****MV Maverick**

No one ever caught a bass because they can run 70 mph. It's how a boat performs when you're actually fishing that's important. We packed these boats with hard-working features that serious bass fishermen look for. Automatically aerated livewells, locking storage, dry storage, pre-wired for trolling motors. All protected by the finest welded or riveted aluminum bass boat construction you can find. They handle plenty of horsepower, but are remarkably affordable.

**MV Super Bandit**
**MERCURY**  
**OUTBOARDS**

Pre-rig with Mercury power for dependable performance.

MV Super Hawk CS  
AW Drop Deck

MV Angler

MV Super Hawk CS

These boats are constructed with the same meticulous attention to detail and durable construction as our Predator and Maverick series, but are smaller and more affordable versions. They come pre-wired for trolling motor and electronics, feature a built-in

livewell, and storage forward and aft. Available in riveted or all-welded construction. Alumacraft quality, performance and price means you'll spend your time fishing, not paying off the bank.

A FISH STALKING MACHINE

# Fish Hunter

NEW FOR 1999

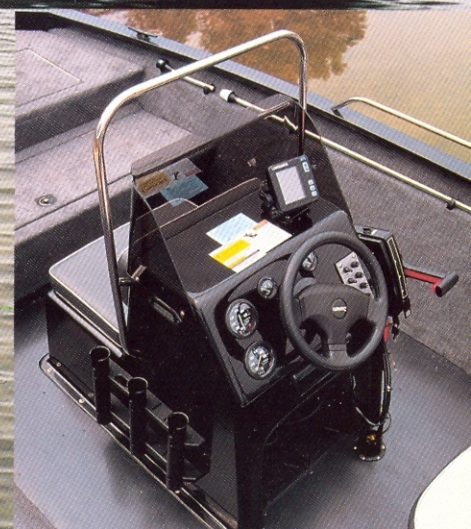

TOP RIGHT: You'll get top performance in any water. The modified-V hull design excels in big water and the optional tunnel hull gives you extra performance in the shallowest backwaters.

BOTTOM RIGHT: Deluxe console features grab rail, windshield, rod holders and an aerated baitwell with seat cushions.

Fish Hunter

## Fish Hunter

LENGTH	18'0"
WIDTH (Beam/bottom)	86"/60"
HORSEPOWER	60-115hp
CAPACITY (persons)	4
WEIGHT	1000#
HULL Gauge	.102"

BOATS ARE PICTURED WITH OPTIONAL ACCESSORIES.

Pre-rig with dependable  
Mariner power.

We designed the Fish Hunter to perform in extremely shallow flats and bays. The modified-V hull moves silently through calm flat water, yet can handle the roughest white caps big water can stir up. Seventeen lateral reinforcing ribs, a solid .102" gauge hull, plus a center console and control center make it the ideal weapon for pursuing big fish. Elevated casting decks, three stationary seats, and pedestal seats forward and aft give you lots of fishing options. If you're going hunting for trophy class fish, let the Fish Hunter be your guide.

**ALUMACRAFT** BOAT CO.

HIGH PERFORMANCE WITHOUT THE HIGH PRICE

HOT FUN IN THE SUMMERTIME

# Crappie Series

Crappie Magnum

Pre-rig with Mariner power  
for peak performance.

There's nothing like the fun of hauling in lots of panfish. And there's no better way to do it than in the comfort of an Alumacraft built specifically for panfishing. These boats were engineered top to bottom, bow to stern to give panfishermen as much comfort as possible. You can easily work both sides of the boat from the swivel seats. Built-in storage compartments keep lunch and rain gear tucked away. And the aerated livewell sits within easy reach of both seats. For the ultimate crappie boat—step up to Alumacraft.

## MERCURY OUTBOARDS

Pre-rig with Mercury power for peak performance.

HIGH PERFORMANCE WITHOUT THE HIGH PRICE.

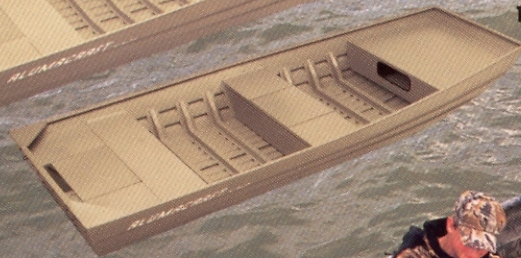

AMERICA'S PREMIER JON BOATS

# All-Welded Jon Boats

50 years of craftsmanship go into every one of these boats. The strong all-welded construction, the modified-V hull and flat bottom, the heavy gauge aluminum, the number of ribs (go ahead, count 'em), all add up to a craft built to work harder, faster and drier. Optional camo pattern, center or side consoles, tunnel hull.

MV1860 AW

1650 AW

MV 1544 AW DD Duck Special

Camo patterns may vary.

**MERCURY**  
**OUTBOARDS**

Pre-rig with Mercury power for dependable performance.

## OXR HULL = QUANTUM CROSS RIBS

**MORE RIBS.** Our QXR Hull jon boats are built with cross ribs positioned on 12" centers. By closely spacing the ribs we achieve greater stability and strength the entire length of the boat.

**BIGGER RIBS.** These ribs can take a pounding. The QXR Hull features heavier, wider, stronger ribs. Extra strong ribs means a tougher, more rigid boat.

V-Bow 1650 AW  
Tunnel

**ALL-WELDED OR RIVETED.** Our AWs are the first choice for those who prefer all-welded construction. If you want lighter weight, you'll appreciate our 50 years of riveted boat building experience.

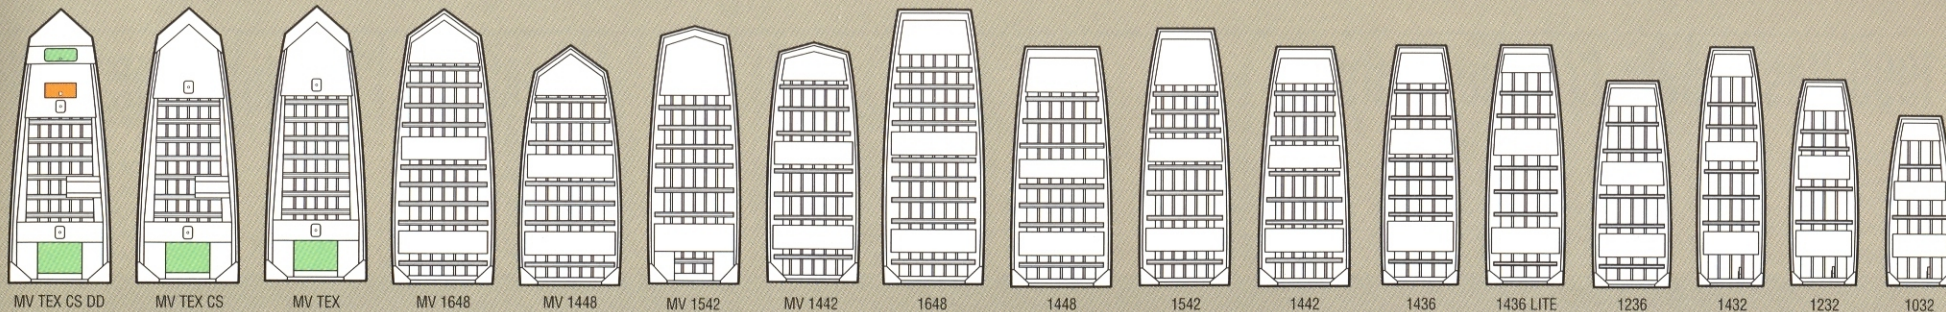

BOATS ARE PICTURED WITH OPTIONAL ACCESSORIES.

For superior  
jon boat  
performance.

**HEAVIER GAUGE.** The top marine grade aluminum used in building the QXR Hull is thicker than you'll find on most competitive boats. One more reason why our jons are more rugged than a thin-skinned jon.

**MORE SELECTION.** No one builds a greater variety of jon boats. Pick the size and style you need — 10' to 20' long, 32" to 72" wide, with a modified-V or flat bottom hull, and optional configurations.

**SEE THE DIFFERENCE.** Look closely. You'll see tighter fit in our jons, smooth even seams in our welds, bigger, stronger rivets, and precision construction throughout. This is a boat you'll be proud to say is yours.

THEY LAST AND LAST AND LAST

# Riveted Jon Boats

We challenge you to find a flat bottom jon with heavier gauge marine alloy aluminum, more lateral ribs, and superior quality of construction. You won't. These tough, hard working jons set the standard for all others. Optional features include steering consoles, center seats with livewell, no center seat, and more. BOATS ARE PICTURED WITH OPTIONAL ACCESSORIES.

Optional clamp-on camo seat.

**YAMAHA**  
Outboards

Pre-rig with Yamaha power for peak performance.

### ALUMACRAFT LIMITED WARRANTY.

Alumacraft stands behind every boat we build. Each aluminum boat that leaves our plant is warranted to the original purchaser to be structurally sound and free from defects in materials and workmanship. We provide one of the best limited warranty programs available in the industry. This limited warranty is provided with the purchase of every boat or canoe from an authorized Alumacraft dealer. See your dealer for specific warranty and service information.

Photos, illustrations, and data in this catalog were based on information available at time of publication. See your dealer for the most current specifications and warranty information. Prices, dimensions, capacities, ratings, specifications and options are subject to change. Alumacraft reserves the right to make changes without notification or obligation. Specifications calculated using U.S. Coast Guard formulas. All boats comply with U.S. Coast Guard and Canadian government regulations. All Alumacraft boats are NMMA and CMMA certified for compliance with standards for flotation, fuel systems, ventilation, electrical and safety. All ratings comply with the Federal Boat Safety act of 1971.

Some of the equipment pictured in this catalog is optional at extra cost. See your Alumacraft dealer for availability and current pricing.

1999 Predator 17 AW Deluxe pg. 2

1999 Crappie Magnum pg. 6
