ALUMACRAFT LIMITED WARRANTY
Alumacraft stands behind every boat we build. Each aluminum boat that leaves our plant is warranted to the original purchaser to be structurally sound and free from defects in materials and workmanship. We provide one of the best limited warranty programs available in the industry. This limited warranty is provided with the purchase of every boat or canoe from an authorized Alumacraft dealer. See your dealer for specific warranty and service information.

Photos, illustrations, and data in this catalog were based on information available at time of publication. See your dealer for the most current specifications and warranty information. Prices, dimensions, capacities, ratings, specifications, features and options are subject to change. Alumacraft reserves the right to make changes without notification or obligation. Specifications calculated using U.S. Coast Guard formulas. All boats comply with U.S. Coast Guard and Canadian government regulations. All Alumacraft boats are NMMA and CMMA certified for compliance with standards for flotation, fuel systems, ventilation, electrical and safety. All ratings comply with the Federal Boat Safety act of 1971.

Some of the equipment pictured in this catalog is optional at extra cost. See your Alumacraft dealer for availability and current pricing.

CONISTER

Building relationships, one boat at a time.

HIGHEST GRADE MARINE ALUMINUM

There is none better. An exceptional blend of strength, puncture resistance and long life.

FOAM-IN-PLACE FLotation

Gas-resistant poured foam fills every crevice, increasing hull strength, quieting the ride and adding stability.

ALUMA-FRAME CONSTRUCTION

Heavy gauge aluminum transverse and longitudinal framing is formed to optimal hull bottom shape. Maximum structural support with minimum weight. Standard on most models.

ALUMA-CLAD TRANSOM

Treated wood is clad inside and out with thick aluminum to minimize vibrations, quiet the ride and eliminate maintenance.

GAS TANKS

Space-saving built-in tanks, standard on many models, are positioned for optimum balance, performance and ride. Built-in reserve on Tournament Pros and Trophy 185.

ONE-PIECE BOTTOM

The entire boat bottom is made from a single piece of aluminum. A one-piece bottom is stronger and has greater structural integrity than pieced-together bottoms.

RIVETED CONSTRUCTION

Special heat-treated and hardened aircraft-grade rivets ensure durability and long life. Oversized rivets are utilized in stress areas instead of drilling more holes and doubling up with smaller rivets.

SEAT BASE PLATES

Heavy gauge aluminum base plates under the floor provide a rock-solid platform for seat base mounts.

LIVWELL LINERS

Protective polyethylene liners with rounded edges help keep your catch fresh. Some models are further insulated for even greater fish preservation.

CASTING PLATFORM

Specially treated marine plywood platform is covered with high quality Olefin marine carpeting to shrug off weather.

REINFORCED CENTER KEEL

One-piece, preformed, extruded keel extends from bow tip to stern providing a backbone of strength and protection. Engineered with 1/4" solid aluminum at wear points.

2XB BOW TWIN-PLATING

Adds an extra layer of strength to critical bow areas on Tournament Pro, Trophy, Phantom V170, Magnum, Navigator, MV Maverick, MV Angler and Crappie Pro.

NO-FEEDBACK STEERING

Every console model we build features no-feedback steering. Unlike ordinary systems, you'll never feel the motor pull on the wheel—you run straight until you choose to turn. Dual cables used on select models.

INSTRUMENT PACKAGES

Customized long-life, high-tech instrument packages present detailed information in clear view for greater control and safer boat operation.

HAND HOLDS

Your passengers find one everywhere they need one—in all running positions.

SPRAY RAIL

Large Reverse Dispersal Wave Action Spray Rail is contoured to deflect splash down and away. Provides a drier ride even in rough water.

URETHANE FINISH

The best finish available—base coat with clear coat matches current automotive colors. Tough, high-gloss, resists chipping, corrosion and wear for years of brilliance.

2XB HULL SYSTEM

The hull that redefined the standard for durability. Twin aluminum plates run the entire length of the boat bottom. Trophy, Tournament Pro and Phantom V170 models.

ALUMACRAFT BOATS HAVE BEEN ASSEMBLED BY HAND USING THE FINEST MATERIALS FOR MORE THAN 50 YEARS.

MERCURY

The Water Calls

Pre-rig with Mercury power
for peak performance.

Take a look at the only twin-plated hull system in the industry—two layers of aluminum provide unparalleled strength, protection and performance. Always boat safely. A professional driver drove this Tournament Pro on a controlled course.

Why we're beating the competition 2 to 1.

Plain and simple, our 2XB Hull System is twice the bottom. The added durability of the twin-plating is obvious. But the solid feel, the crisp handling, and the soft, quiet and dry ride are bonuses you might not have expected.

1. A MORE SOLID RIDE

Everyone who drives a 2XB Hull System boat comes back with the same exuberant response: "this really is solid, you can actually feel it". The 2XB Hull. If you're not sold on it, you haven't driven one.

2. BETTER HANDLING

The double bottom is not only a stronger design, it's also a truer design. Even under brutal conditions the integrity of the hull is not compromised—no flexing, no subtle changes in shape that can affect handling. The boat performs as it is supposed to even in rough conditions where handling is extra critical.

3. QUIETER OPERATION

A 2XB Hull is quieter than other hulls. The extra plate and solid construction dramatically reduces sound and vibrations that transmit from below. Go ahead and start up a conversation.

4. MORE DURABLE CONSTRUCTION

Two aluminum plates hold up better than a thinner single plate. If you're the kind of driver who pushes it, even in heavy seas, this is the hull you want. The 2XB is designed with enough strength to tame the worst conditions.

5. BETTER SELECTION

The 2XB Hull System is now standard on all Trophy Series, Tournament Pro Series and Phantom V170 boats. The 2XB Bow is standard on Magnum, Navigator, MV Maverick, MV Angler and Crappie Pro. So no matter what kind of fishing and boating you do, you can still have the security of 2XB construction.

6. DOUBLE PROTECTION

Two aluminum plates cover the bow area and extend the length of the boat bottom in the 2XB Hull System. Your boat has extra protection all the way to the transom.

7. STRONGER & LIGHTER WEIGHT

You don't pay a weight penalty with a 2XB Hull. The extra aluminum plate adds minimal pounds to overall boat weight.

8. AFFORDABLE

You would expect to pay a big premium for this revolutionary hull, but state-of-the-art manufacturing keeps costs in line. In fact, an Alumacraft with the 2XB Hull costs less than many boats with double-plating only under the bow.

2XB HULL

Who says you can't do it all?

The Trophy is the most versatile boat we build. You can fish with friends, guide your clients, ski with family, and entertain associates all in the same craft. The impressive depth and beam of the Trophy combine with the 2XB Hull System to provide uncompromising confidence, security and comfort in rough water. That's why the U.S. Coast Guard operated Trophy 185s on Lake Superior for more than 10 years. For your family, your associates, your friends and yourself, there is no better way to enjoy the water.

The convertible top set protects you from the elements. Shown with optional aft and side curtains

2XB HULL

TOURNAMENT PRO 195

This is it. You are now the ultimate predator and everything else is prey. The Tournament Pro 195 is your meal ticket. This boat has captured the awe of tournament fishermen across the country. They like it because it handles and fishes like a dream. They like it because it's built with the nearly-indestructible 2XB Hull System. They like it because it's roomy, comfortable and loaded with top-of-the-line tournament fishing features. And it offers top performance even with four fishermen on board. They like it for the same reasons you will.

MAGNUM 165

No other mid-sized, mid-priced boat rides as dry and handles as beautifully. The Magnum is wide, it's deep and as stable as it gets—both running and fishing. Whether you're teaching your grandkids to fish, or seeking quality time with a good friend, there's plenty of room to work and a place for all your gear. Locking electronics compartment and state-of-the-art instrumentation are standard. Gas tank, storage lockers, casting platforms and livewell are all magnum sized.

VALUE/TOTAL VS/Ts

For some, less is more.

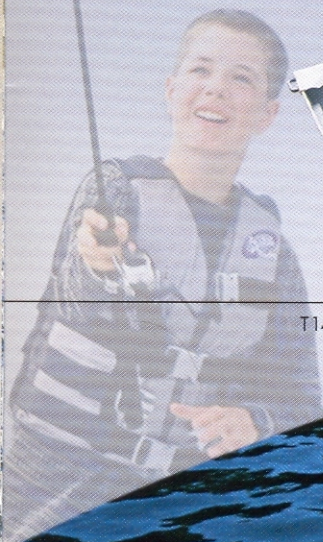

Pictures of functional beauty, these boats are as hard working and dependable as a summer day is long. No frills, no whistles, just classic Alumacraft quality. They're the most unpretentious boats on the water. Whether bouncing along in the back of a pickup or lined up on a resort dock, our V & T models are a portrait of American fishing tradition. There's a reason you find them on nearly every lake across North America. They last and last and last.

Portage pads and motor bracket are optional.

The luring song of a loon is the only sound you hear as you glide silently along. The flat bottom hull gives you more stability and is easier to paddle than a rocker bottom design. Alumacraft is America's premier canoe builder. We spot weld ribs, gunwales and the center seam to eliminate rivet drag and leaks. Stems are made from extra-strong .090" gauge solid aluminum and the tie-down eyelet is 100% stainless steel. There's a reason you see Alumacrafts stacked on outfitter's trailers around the world.

Big things do come in small packages.

The Fisherman is an excellent boat for a couple of busy anglers, but has a capacity rating of four passengers. Its size makes it easy to operate and easy to maneuver—both in and out of the water. This rugged boat was built for optimum performance and fishing function on small to medium-sized bodies of water and is an excellent choice for the all-species fisherman.

- Center console control center w/windshield, rod holders, aerated baitwell, cushions and grab rail
- Stereo
- And more. See complete specs on page 2.

Console control center.

Fish Hunter

Pre rig with Johnson power for peak performance.

FISH HUNTER

Our new Phantom AW features our refined deep-V hull welded from .125" gauge marine grade aluminum. The riveted V170 version features our incomparable 2XB Hull—twin plates cover the entire boat bottom. The result is all-around performance plus exceptional durability.

Unlike many other "high-performance" boats that slide better than they turn, a Phantom not only runs as hard as you want, it carves a dry, precise turn when you tell it to. Both boats are loaded with fishing features. If you want superior bass boat performance all the time—running, turning and fishing—you want a Phantom.

The Fish Hunter was built to perform in shallow flats and bays. The modified-V hull moves silently through calm flat water, but still handles a rough chop. It's the ideal weapon for pursuing big fish. If you're going hunting for trophies in the shallows, let the Fish Hunter be your guide.

MV ANGLER

Angler

MV MAVERICK

The bass don't care what you pay for your boat.

MAVERICK

We build the hard-working Maverick with the features dedicated bass fishermen look for, with an eye toward value. The double-layered 2XB Bow and aluminum floor hold up where others won't. The fishing features include trolling motor electrics, an aerated livewell, rod locker and a lot more.

The Angler and SuperHawks are constructed with the same meticulous attention to detail and durable construction as our Phantom and Maverick series, but are smaller and more affordable versions. They too are loaded with fishing features. The Super Hawk comes in both an all-welded AW Drop Deck version and a lighter weight riveted model. There's no reason you can't have a quality bass boat that fits your budget and your fishing style.

CRAPPIE PRO

Let the good times roll.

Crappie Series

There's nothing like childhood memories of catching panfish by the basketfull. And there's no better way to recreate those moments than in the comfort of an Alumacraft built specifically for panfishing. These boats were engineered top to bottom, bow to stern to give panfishermen as much comfort and fun as possible. You can easily work both sides of the boat from the swivel seats. Built-in storage compartments keep lunch and rain gear tucked away. And the livewell sits within easy reach of busy anglers. For the ultimate in good times—step into an Alumacraft.

CRAPPIE SERIES FEATURES

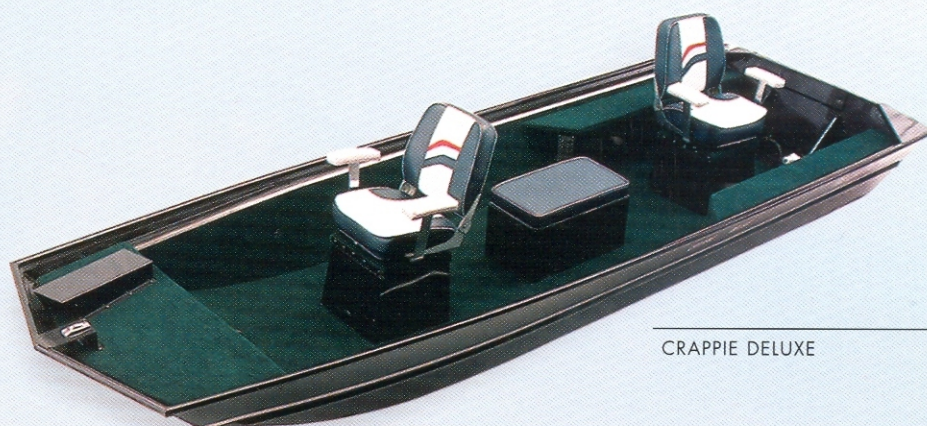

- No-feedback console steering (C.Pro, Tex Special)
- Easy access livewell
- 12 volt trolling motor electrics (C.Pro, Tex Special)
- Raised forward casting deck (C.Pro, Tex Special)
- Storage areas
- And more. See complete specs on page 2.

ALL-WELDED

It takes extraordinary steps to build extraordinary jons.

**Models from 14' to 20' long and 36" to 72" bottom width,
See page 2 for complete model listing and specifications**

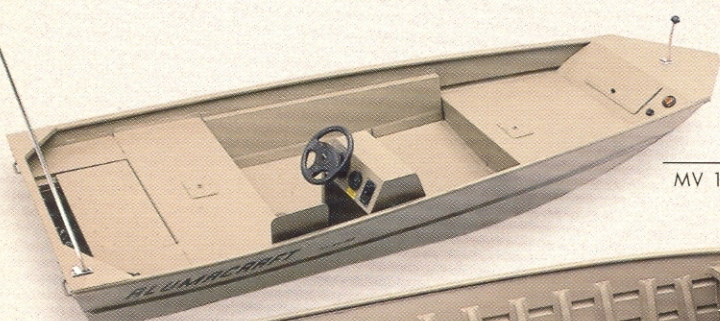

Top-to-bottom, end-to-end, the toughest jon boats you can buy. Count the number of lateral reinforcing ribs in the QXR Hull and you'll know it's no ordinary jon. These jons are pure workaholics. Deluxe versions offer optional center or side console and built-in livewell, aluminum floor, navigation lights, bilge pump, trolling motor harness w/plug and receptacle and more. Drop deck models are also available, as well as tunnel hull models. You won't find a tougher jon boat with a stronger hull for work or play.

Optional tunnel hull and optional center console available for select models

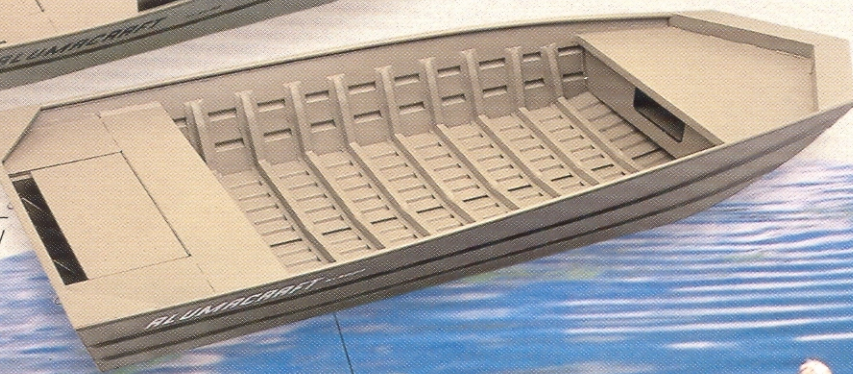

Birds of a different feather

The new Waterfowler 16 and 15 were designed specifically for hunters. The flat slip-resistant floors and decks provide obstacle-free movement and solid footing. They also make it easier to retrieve your dog. Outfit yours with an optional no-feedback steering console and camouflage paint. The optional gun box provides secure storage for your guns.

QXR
HULL

Guides, fishermen, hunters, construction workers, law enforcement agencies, they all buy jons for work and play. They require boats with unquestionable durability and structural integrity, boats that will go as hard as they do. Alumacraft Jon Boats with the QXR Hull are built to take decades of hard use. For a jon that's tougher than any job on the water, ask your Alumacraft dealer for the QXR Hull

ALL-WELDED OR RIVETED.

Our AWs are the first choice for those who prefer all-welded construction. If you want lighter weight, you'll appreciate our 50 years of riveted boat building experience.

HEAVIER GAUGE.

The top marine grade aluminum used in building the QXR Hull is thicker than you'll find on most competitive boats. One more reason why our jons are more rugged than a thin-skinned jon.

MORE RIBS.

Our QXR Hull jon boats are built with cross ribs positioned on 12" centers. By closely spacing the ribs we achieve greater stability and strength the entire length of the boat.

BIGGER RIBS.

These ribs can take a pounding. The QXR Hull features heavier, wider, stronger ribs. Extra strong ribs means a tougher, more rigid boat.

MORE SELECTION.

No one builds a greater variety of jon boats. Pick the size and style you need—10' to 20' long, 32" to 72" wide, with a modified-V or flat bottom hull, and numerous optional configurations.

SEE THE DIFFERENCE.

Look closely. You'll see tighter fit in our jons, smooth even seams in our welds, bigger, stronger rivets, and precision construction throughout. This is a boat you'll be proud to say is yours.

QXR=QUANTUM CROSS RIBS *As tough as the customers who buy them!*

MV 1448

Optional camo clamp-on seat

MV TEX CS

We give you your choice of all-welded or riveted construction. Our riveted jons are lighter in weight than our welded models, but still feature the rugged, legendary QXR Hull. We challenge you to find a riveted flat-bottom or modified-vee jon with heavier gauge marine alloy aluminum, more lateral ribs and superior quality construction. You won't. For big jons, small jons, any jon, you won't find better choices. Optional features include center- and side-steering consoles, livewells, no center seat, and more. Alumacraft jons—we build 'em with attitude.

**Models from 10' to 16' long and 32" to 48" bottom width,
